Ralph Waldo Emerson Ralph Waldo Emerson, 2015-05-18 On September 8 1836 the day before the publication of Nature Emerson met with Frederic Henry Hedge George Putnam and George Ripley to plan periodic gatherings of other like minded intellectuals This was the beginning of the Transcendental Club which served as a center for the movement Its first official meeting was held on September 19 1836 On September 1 1837 women attended a meeting of the Transcendental Club for the first time Emerson

invited Margaret Fuller Elizabeth Hoar and Sarah Ripley for dinner at his home before the meeting to ensure that they would be present for the evening get together Fuller would prove to be an important figure in Transcendentalism Emerson anonymously published his first essay *Nature* on September 9 1836 A year later on August 31 1837 Emerson delivered his now famous Phi Beta Kappa address *The American Scholar* then known as *An Oration Delivered before the Phi Beta Kappa Society at Cambridge* it was renamed for a collection of essays which included the first general publication of *Nature* in 1849 Friends urged him to publish the talk and he did so at his own expense in an edition of 500 copies which sold out in a month In the speech Emerson declared literary independence in the United States and urged Americans to create a writing style all their own and free from Europe James Russell Lowell who was a student at Harvard at the time called it an event without former parallel on our literary annals Another member of the audience Reverend John Pierce called it an apparently incoherent and unintelligible address

Kant's System of Nature and Freedom Paul Guyer, 2005-04-21 The concept of systematicity is central to Immanuel Kant's conception of scientific knowledge and to his practical philosophy But Kant also held that we must be able to unite the separate systems of nature and freedom into a single system on the one hand morality itself requires that we be able to see its commands and goals as realizable within nature while on the other hand our experience of nature itself leads us to see it as a system with the goal of human moral development The essays in this volume including two published here for the first time explore various aspects of Kant's conception of the system of nature the system of freedom and the system of nature and freedom The essays in the first part explore the systematicity of concepts and laws as the ultimate goal of natural science consider the implications of Kant's account of our experience of organisms for the goal of the unity of science and examine Kant's attempts to prove that the existence of an ether is a necessary condition for a physical system of nature The essays in the second part explore Kant's view that morality requires a systematic union of persons as ends in themselves and of the ends that persons set for themselves and examine the system of duties and obligations necessary to realize such a systematic union of persons and their ends These essays thus examine both

the general foundations of Kant's moral philosophy and his final account of the duties of right or justice and of ethics or virtue in his late work the *Metaphysics of Morals*. The essays in the third part examine Kant's attempt in the last of his three great critiques the *Critique of the Power of Judgment* to unify the systems of nature and freedom through a radical transformation of traditional teleology as a theory of the creation of organic nature into an account of our experience of organic nature and of nature as a whole

Selected Essays Ralph Waldo Emerson, 1982-04-29 Ralph Waldo Emerson believed that an appreciation of its vast natural resources would become the foundation of American culture. His assertion that human thought and actions proceed from nature was a radical departure from the traditional European emphasis on domesticating nature to suit human needs. His philosophy is rich in common natural scenes of daily life and expresses the inherent harmony between man and nature. This collection brings together 15 of Emerson's most significant essays including *Nature*, *The American Scholar*, *Self-reliance*, and *The Transcendentalist*, as well as his assessments of Montaigne, Napoleon, and Thoreau.

[The Myth of the Fall in Nineteenth-Century Literature](#) Linda Freedman, 2025-07-15 Why does the myth of the Fall continue to matter in an increasingly secularised world? Why do we continue to imagine a point where everything went wrong and why must we imagine that things were once better than they are now? Modern political theodicies repeatedly play to the myth of the Fall as empowering human authorship promising to take back control or make America great again. The myth of the Fall is so absorbed into western culture that we sometimes don't even notice it's there let alone think about why and how it has persisted through secularisation. It is often pernicious playing on feelings of innate supremacy and lost dominion. Linda Freedman shows that it is also creative the first act of disobedience and resistance which set new human stories in motion and gave narrative shape to existence. Nineteenth century writers were so steeped in Christian traditions that the Fall remained an ineluctable structure of thought and even those who resisted or tried to secularise its doctrinal orthodoxies tended to affirm its logic. It was a political, social and cultural force as well as an aesthetic preoccupation a way of reflecting on the limitations and possibilities of art and literature driving innovations in prose, poetry and the novel. Rethinking narratives of American exceptionalism with transatlantic and anti-racist writings. Freedman captures some of the most theologically imaginative and aesthetically and politically interesting textures of the Fall in nineteenth century literature. The myth of the Fall survives as much more than a judgmental and repressive social mechanism and mattered to people living vastly different lives. This is partly due to the adaptability and force of its narrative logic and partly because it gives narrative time the feel of a quest an infinite search for meaning. The Fall holds onto the otherworldly and the unworldly. It serves as a formal metalanguage a residually and sometimes explicitly religious aesthetic an origin myth of modernity a source for being in time.
