report the Food and Agriculture Organization of the United Nations FAO and the World Food Programme WFP warn that acute food insecurity is likely to worsen across 13 countries and territories identified as hotspots during the outlook period from June to October 2025 The Sudan Palestine South Sudan Haiti and Mali remain hotspots at the highest concern level while Yemen the Democratic Republic of the Congo and Myanmar are classified as hotspots of very high concern Other hotspots are Afghanistan Burkina Faso Chad Somalia and the Syrian Arab Republic Since the October 2024 edition Afghanistan and the Democratic Republic of the Congo have been elevated to hotspot status Conversely regional clusters in East Africa Ethiopia and Kenya and Southern Africa Lesotho Malawi Mozambique Namibia Zambia and Zimbabwe as well as Niger are no longer classified as hotspots due to improvements in climatic conditions Nigeria and Lebanon are also no longer classified as hotspots due to some improvement in the economic situation and a reduction in the intensity of military operations respectively Although these countries are no longer considered hotspots for the outlook period future economic and conflict related shocks or climatic shifts could lead to their reclassification For the outlook period funding for food and nutrition assistance falls critically short Funding for humanitarian assistance must not be reduced Instead urgent assistance should be scaled up to protect livelihoods and improve food access across all hunger hotspots This report outlines country specific recommendations for urgent emergency responses as well as anticipatory actions to meet existing humanitarian needs and implement short term protective interventions before new crises emerge The report focuses on the most severe and deteriorating acute hunger situations but it does not represent all countries territories experiencing high levels of acute food insecurity

Practical guidelines for Early Warning - Early Action plans on agricultural drought Food and Agriculture Organization of the United Nations ,2020-11-26 The impact of drought in agriculture is one of the most complex natural hazards to predict and mitigate It carries a constant risk for most smallholder farmers around the world According to studies conducted by the Food and Agriculture Organization of the United Nations FAO 83 percent of all damages and losses caused globally by drought between 2006 and 2016 have been absorbed by agriculture putting a good part of the world population at risk of food insecurity The guide aims to guide governments and other relevant actors in the development of early warning early actions on agricultural drought plans that must be implemented before a drought event has significant impacts and causes damages and losses that could eventually become a disaster The manual complements other instruments used at global and local levels to develop EWEA on agricultural and response plans related to drought

Contemporary Famine Analysis Olivier Rubin,2015-12-11 This Brief provides some answers as to why famines continue to torment humankind here in the 21st century despite all our progress in food production logistics information dissemination and relief work Contemporary famines are inherently political and so the interesting question is not how famines can be prevented but why they are allowed to develop in the first place only by understanding the latter is there hope to eradicate major famines The Brief assesses the various analytical approaches to the understanding of famine from the classical approaches inspired by

Thomas Malthus to the newer economic approaches based on Amartya Sen. While all approaches contribute with important insights on famine dynamics, they also struggle to capture the political dimension of contemporary famines. The Brief develops a political approach capable of addressing this important but messy political dimension of contemporary famines. The approach builds on principles of humanitarian accountability, the moral responsibility to alleviate suffering from famine as well as political accountability, the interests and power relations involved in famine outcomes.

Africa regional overview of food security and nutrition 2020 Food and Agriculture Organization of the United Nations, United Nations Economic Commission for Africa, African Union Commission, 2021-06-29. Africa is not on track to meeting the Sustainable Development Goal SDG 2 targets to end hunger and ensure access by all people to safe nutritious and sufficient food all year round and to end all forms of malnutrition. The number of hungry people on the continent has risen by 47.9 million since 2014 and now stands at 250.3 million or nearly one fifth of the population. The 2017, 2018, and 2019 editions of this report explain that this gradual deterioration of food security was due to conflict, weather extremes, and economic slowdowns and downturns, often overlapping. A continued worsening of food security is expected also for 2020 as a result of the COVID-19 pandemic. In addition to hunger across all countries in Africa, millions of people suffer from widespread micronutrient deficiencies, and overweight and obesity are emerging as significant health concerns in many countries. This report shows that the food system in Africa does not provide food at a cost that makes nutritious food affordable to a majority of the population, and this is reflected in the high disease burden associated with maternal and child malnutrition, high body mass, micronutrient deficiencies, and dietary risk factors. The report also shows that current food consumption patterns impose high health and environmental costs which are not reflected in food prices. The findings presented in this report highlight the importance of prioritizing the transformation of food systems to ensure access to affordable and healthy diets for all produced in a sustainable manner.

2017 Near East and North Africa Regional Overview of Food Security and Nutrition Food and Agriculture Organization of the United Nations, 2018-04-17. The 2017 Near East and North Africa (NENA) edition of the Regional Overview of Food Security and Nutrition comes under the theme of building resilience for food security and nutrition in times of conflict and crisis. The report establishes a baseline against which to measure future progress towards achieving SDG 2 on ending hunger, food insecurity, and malnutrition in NENA by monitoring the latest indicators for the SDG targets on hunger and food insecurity (SDG Target 2.1) and malnutrition (SDG Target 2.2). Beyond numbers, the report focuses on the fundamental factors that have driven improvements in food security and malnutrition: poverty reduction, economic growth, improvements in maternal and childhood nutrition, and public health. Increases in the quantity and quality of the food supply and cessation of violence. Moreover, the report brings into sharp focus the issue of conflict, which is the major driver of food insecurity in the NENA region. Food security in the NENA region is fast deteriorating, driven by conflict and leading to a widening gap in well-being between conflict and non-conflict countries. Conflicts have long-lasting impacts on the food

security and nutrition of both affected and surrounding countries in the region Not only is food security deteriorating in the conflict and spill over countries but the high costs of perpetrating containing preventing and dealing with the consequences of violence undermine their ability to mitigate the decline in living standards Health in Humanitarian Emergencies David Townes, Mike Gerber, Mark Anderson (Physician), 2018-05-31 A comprehensive best practices resource for public health and healthcare practitioners and students interested in humanitarian emergencies *The Magistrates' Court Manual* P.
