have to reconsider the perennial questions concerning human nature What are the special human behaviours social practices
and psychological structures that makes us particularly human The field of evolution psychology and cognitive science is the
most expanding inter disciplinary area for the time being uniting different sciences under the same evolutionary paradigm
and keeping them occupied by the same eternal questions stated above Relevant data and theoretical considerations are
piling up but an overview is needed To facilitate this a large inter disciplinary conference entitled Human Mind Human Kind
was held at University of Aarhus Denmark More than 100 experts presented their latest research and after careful selection
20 of these contributions have found their way to this volume The studies fall into three well defined sections Evolution and
