

LESSON PLANS

Lesson: 6.2- Adding Unlike Denominators

Objectives: I can add unlike denominators.

Standards: 5.NF.1.1

Materials:
- Pencils
- Expo Markers
- Pre-printed copies
- Numbers printed on another paper

Whole Group Lesson: Today we will be adding fractions with unlike denominators. Remember that the denominator is the bottom number. We are going to add fractions with denominators that don't match. Our lesson yesterday will help us a lot. Let's add

$$\frac{1}{2} + \frac{1}{8} =$$

Notice the denominator doesn't equal each other. You need to find a multiple that is common between the 2 and the 8. What multiples are common? That's right- 8! Now, $2 \times \underline{\quad} = 8$. What is the blank? 4. Whatever you do to the bottom you have to do to the top. 2×4 and 1×4 . Your fraction now becomes:

$$1 \times 4 = 4$$

Notice that I added across the top but the denominator remained the same.

Small Group Lesson: "You will use these cards for Unit 6.3" Using pre printed copies, have students add pull fractions from the pile at random and add the fractions.

Remediate	On-Level	Above Level
If students struggle with finding the LCM, have them use the LCM chart from the previous lesson. The skill itself is not to identify the LCM, it is to add the fractions so allow them to have success.	Have students practice verbally stating the LCM to find the common denominator. If you still have students struggle, then allow them to use the LCM chart as well.	Have students practice with the cards. Allow them to list the multiples on paper or even use the LCM chart if ABSOLUTELY necessary. Once they master the skill, have them add 3 fractions.

Independent Practice: Have students practice on the page labeled 6.2 CW.
