survey ratings and narrative reports on 195 countries and fifteen territories are used by policymakers the media international corporations civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide The Freedom in the World political rights and civil liberties ratings are determined through a multi layered process of research and evaluation by a team of regional analysts and eminent scholars The analysts used a broad range of sources of information including foreign and domestic news reports academic studies nongovernmental organizations think tanks individual professional contacts and visits to the region in conducting their research The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights and these standards are applied to all countries and territories irrespective of geographical location ethnic or religious composition or level of economic development **Final Budget Summary** California,2012 Germany's Foreign and Security Policy in Syria and Iraq, 2011-2016 Sebastian Maier,Bruno Schmidt-Feuerheerd,2016-08-01 This analysis strives to factually present the evolution of Germany s foreign and security policy vis vis the Syrian Arab Republic and the Republic of Iraq It assesses the question of whether German foreign policy is guided by a new doctrine insofar as it envisages to assume more security policy responsibility on the global stage as stated in the recently published 2016 White Paper on German Security Policy and the Future of the Bundeswehr **History of Cenozoic Mammals from South America** Federico Agnolin,2024-04-23 The Cenozoic history of South America faunas mainly rests on the evidence yielded by the study of fossil mammals Following the seminal work of William D Matthew George G Simpson established the slogan Splendid Isolation for describing the evolutionary history of South American faunas He envisaged South America as well as other Southern Hemisphere landmasses as dead ends in the evolution and geographical expansion of animals and plants that since the Mesozoic come in successive migratory waves from the North More than 40 years passed away from the last important contribution by Simpson 1980 Since then in spite to the exponential increase in biological paleontological and geological knowledge and an incredibly new number of fossils his scheme remained almost unpolluted and most recent books regarding the palaeobiogeography of South American vertebrates follow this paradigm nearly without criticism However the factthat South America was joined to Africa Australia Antarctica and India during most of the Cretaceous and that it was still connected Australia via Antarctica and probably Africa up to the Paleogene together with the large number of shared biotic components between these landmasses point in favor of a different paleobiogeographical scenario The book aims to demonstrate that during the Paleogene and most of the Neogene the nature and evolutionary history of South American vertebrates is by far much more intricate than previously envisaged As will be shown new evidence suggests that southern landmasses may have played an important role in the early evolution and radiation of extant mammal clades This book is not written to conform with the ideal of a technical manual or a review and is not carried forward to collect all that has been said before The main goals are to criticize the current Palaeobiogeographic Model of Vertebrate Settlement of South America and to propose a new vision
