Mark Scheme November 2014 97:

Law and Time Sian Beynon-Jones, Emily Grabham, 2018-09-21 Research on law's relationship with time has flourished over the past decade. This edited collection aims to put law and time scholarship into wider context, advancing conversations on time and temporalities between socio-legal scholars, anthropologists, sociologists, geographers, and historians. Through a diverse range of contributions, the collection explores how legal modalities of time emerge and have effects within wider clusters of social and political action. Themes include law's diverse roles in maintaining linear historicist models of time, law's participation in the materialisation of times, and the unsteady effects of temporal pluralism and polytemporalities in law. De-naturalising the time in law and time scholarship, this collection positions time as something that can be enacted and materialised as well as experienced, with distinct implications for questions of social justice. The Introduction and Chapter 6 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non-Commercial No Derivatives CC BY-NC-ND 4.0 license.

China's Social Insurance in the Twentieth Century Aiqun Hu, 2015-10-27 In *China's Social Insurance in the Twentieth Century*, Aiqun Hu develops a framework of interactive diffusion of global models in examining the history of China's social insurance since the 1910s. The book covers both Nationalist and Communist controlled areas, 1927-1949, and Taiwan, 1949-present, surpassing the party divide. It argues that China's progression in social insurance resulted from diffusion of two global models: German capitalist and Soviet socialist social insurance until the early 1990s. Thereafter, China's social insurance reforms were increasingly directed by the World Bank's neoliberal models, which also influenced Taiwan's pension reforms. During the entire process, however, global forces provided the basic intellectual framework, while national forces determined the timing and specifics of adopting the models.

Reflections on Architecture, Society and Politics Graham Cairns, 2016-10-04 *Reflections on Architecture, Society and Politics* brings together a series of thirteen interview articles by Graham Cairns in collaboration with some of the most prominent polemic thinkers and critical practitioners from the fields of architecture and the social sciences, including Noam Chomsky, Peggy Deamer, Robert A. M. Stern, Daniel Libeskind, and Kenneth Frampton. Each chapter explores the relationship between architecture and socio-political issues through discussion of architectural theories and projects, citing specific issues and themes that have led to and will shape the various aspects of the current and future built environment. Ranging from Chomsky's examination of the US-Mexico border as the architecture of oppression to Robert A. M. Stern's defence of projects for the Disney corporation and George W. Bush, this book places politics at the center of issues within contemporary architecture.

Data Science for Teams Harris V. Georgiou, 2026-01-01 Managing human resources, time allocation, and risk management in R: this requires not just an Agile approach to project management but a complete rethinking of target setting and team evolution as a unit. Provides readers with deep understanding of how such R for educators in academia; this is probably the last phase of preparing future AI/ML/DA professionals for the tasks they will soon face.

How to Pool

Risks Across Generations Michael Otsuka, 2023-05-28 How to Pool Risks across Generations makes the case for the collective provision of pensions on fair terms of social cooperation Through the insurance of a mutual association which extends across society and over multiple generations we share one another's fates by pooling risks across both space and time Resources are transferred not simply between different people but also within the possible future lives of each person from one's more fortunate to one's less fortunate future selves The book opens with an investigation of the longevity and investment risk that even a single individual on a desert island would face in providing for her old age From this atomistic starting point it builds up within and across the chapters to increasingly collective forms of pension provision By joining together it is possible to tame the risks we would face as individuals each with our own private pension pot A collective pension can be justified as a social union of social unions an enduring corporate body which is formed by agreements to pool risks in a manner that involves reciprocity between the various individuals that constitute the collective Even though all individuals age and die a collective pension scheme remains evergreen as the average age of members remains relatively unchanged through the influx of new members to replace those who retire It is therefore possible to smooth risks indefinitely across as well as within generations to the mutual advantage of each
