## NOTES ABOUT MARK SCHEME SYMBOLS & OTHER MATTERS

<b>B marks</b>	are independent marks, which do not depend on other marks. For a B mark to be scored, the point to which it refers must be seen specifically in the candidate's answer.
<b>M marks</b>	are method marks upon which accuracy marks (A marks) later depend. For an M mark to be scored, the point to which it refers must be seen in a candidate's answer. If a candidate fails to score a particular M mark, then none of the dependent A marks can be scored.
<b>C marks</b>	are compensatory marks in general applicable to numerical questions. These can be scored even if the point to which they refer are not written down by the candidate, <b>provided subsequent working gives evidence that they must have known it</b> . For example, if an equation carries a C mark and the candidate does not write down the actual equation but does correct substitution or working which shows he knew the equation, then the C mark is scored. A C mark is not awarded if a candidate makes two points which contradict each other. Points which are wrong but irrelevant are ignored.
<b>A marks</b>	A marks are accuracy or answer marks which either depend on an M mark, or which are one of the ways which allow a C mark to be scored. A marks are commonly awarded for final answers to numerical questions. If a final numerical answer, eligible for A marks, is correct, with the correct unit and an acceptable number of significant figures, all the marks for that question are normally awarded. It is very occasionally possible to arrive at a correct answer by an entirely wrong approach. In these rare circumstances, do not award the A marks, but award C marks on their merits. An A mark following an M mark is a dependent mark.
<b>Brackets ( )</b>	around words or units in the mark scheme are intended to indicate wording used to clarify the mark scheme, but the marks do not depend on seeing the words or units in brackets, e.g. 10 (J) means that the mark is scored for 10, regardless of the unit given.
<b>Underlining</b>	indicates that this <u>must</u> be seen in the answer offered, or something very similar.
<b>OR/ or</b>	indicates alternative answers, any one of which is satisfactory for scoring the marks.
<b>e.e.o.o.</b>	means "each error or omission".
<b>o.w.t.t.e.</b>	means "or words to that effect".
<b>Spelling</b>	Be generous about spelling and use of English. If an answer can be understood to mean what we want, give credit. However, do not allow ambiguities, e.g. spelling which suggests confusion between reflection/refraction/diffraction or thermistor/transistor/transformer.
<b>Not/NOT</b>	indicates that an incorrect answer is not to be disregarded, but cancels another otherwise correct alternative offered by the candidate i.e. right plus wrong penalty applies.
<b>Ignore</b>	indicates that something which is not correct or irrelevant is to be disregarded and does not cause a right plus wrong penalty.
<b>ecf</b>	meaning "error carried forward" is mainly applicable to numerical questions, but may in particular circumstances be applied in non-numerical questions. This indicates that if a
