**The Routledge Handbook on Cities of the Global South** Susan Parnell, Sophie Oldfield, 2014-03-26 The renaissance in urban theory draws directly from a fresh focus on the neglected realities of cities beyond the west and embraces the global south as the epicentre of urbanism This Handbook engages the complex ways in which cities of the global south and the global north are rapidly shifting the imperative for multiple genealogies of knowledge production as well as a diversity of empirical entry points to understand contemporary urban dynamics The Handbook works towards a geographical realignment in urban studies bringing into conversation a wide array of cities across the global south the ordinary mega global and peripheral With interdisciplinary contributions from a range of leading international experts it profiles an emergent and geographically diverse body of work The contributions draw on conflicting and divergent debates to open up discussion on the meaning of the city in or of the global south arguments that are fluid and increasingly contested geographically and conceptually It reflects on critical urbanism the macro and micro scale forces that shape cities including ideological demographic and technological shifts and constantly changing global and regional economic dynamics Working with southern reference points

the chapters present themes in urban politics identity and environment in ways that re frame our thinking about cities The Handbook engages the twenty first century city through a southern urban lens to stimulate scholarly professional and activist engagements with the city *City Futures* Doctor Edgar Pieterse,2008-11-20 Cities are the future In the past two decades a global urban revolution has taken place mainly in the South The mega cities of the developing world are home to over 10 million people each and even smaller cities are experiencing unprecedented population surges The problems surrounding this influx of people slums poverty unemployment and lack of governance have been well documented This book is a powerful indictment of the current consensus on how to deal with these challenges Pieterse argues that the current shelter for all and urban good governance policies treat only the symptoms not the causes of the problem Instead he claims there is an urgent need to reinvigorate civil society in these cities to encourage radical democracy economic resilience social resistance and environmental sustainability folded into the everyday concerns of marginalised people Providing a dynamic picture of a cosmopolitan urban citizenship this book is an essential guide to one of the new century s greatest challenges **What**
