in order to create a viable concept for remodelling the economy Covering a diverse range of topics and regions including
cities and living food and human waste packaging and law fashion design and art this book provides a multi layered
examination of circularity Transitioning to a circular economy reducing resource input and waste and narrowing material and
energy loops are becoming an increasingly important targets to combat decades of unsustainable models of consumption
However they will require a significant shift in social and cultural thinking and these dimensions have not yet been factored
into policy debates and frameworks While recognising the key role of individual consumers and their behaviours the book
goes beyond this singular perspective to provide equal focus on institutional and political structures as necessary drivers for
real change Social and Cultural Aspects of the Circular Economy argues for a social and solidarity economy SSE to combine
individual actions with a wider cultural shift It will be an important read for scholars researchers students and policy makers
