Global Injustice Symbols and Social Movements T. Olesen, 2015-04-09 Global Injustice Symbols and Social Movements examines our collective moral and political maps dotted with symbols shaped by political dynamics beyond their local or national origin and offers the first systematic sociological treatment of this important phenomenon After the Education Wars Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers After the Education Wars helps us to see a better way forward Cathy N Davidson The New York Times Book Review After the Education Wars is an important book that points the way to genuine reform Diane Ravitch author of Reign of Error and The Death and Life of the Great American School System A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools **The Green Economy in the Gulf** Mohamed Abdel Raouf, Mari Luomi, 2015-07-30 Filling a void in academic and policy relevant literature on the topic of the green economy in the Arabian Gulf this edited volume provides a multidisciplinary analysis of the key themes and challenges relating to the green economy in the region including in the energy and water sectors and the urban environment as well as with respect to cross cutting issues such as labour intellectual property and South South cooperation Over the course of the book academics and practitioners from various fields demonstrate why transitioning into a green economy a future economy based on environmental sustainability social equity and improved well being is not an option but a necessity for the Gulf Cooperation Council GCC States Through chapters covering key economic sectors and cross cutting issues the book examines the GCC states quest to align their economies and economic development with the imperatives of environmental sustainability and social welfare and proposes a way forward based on lessons learned from experiences in the region and beyond This volume will be of great relevance to

scholars and policy makers with an interest in environmental economics and policy **iDisrupted** Michael Baxter, 2015-10-16 iDisrupted changing the human race forever Technology is set to transform the world Its likely impact is both terrifying and incredibly exciting We all need to understand the great changes that are just beginning to re shape the human domain and our daily lives Then we need to draw up plans There are few challenges more important This book is for People who want a job in ten years time Employers who want to hire the right talent for the future Students of business and business professionals who want to understand how technology will transform the commercial world Business leaders and shareholders who want the business they run or own to flourish and not get swept away Investors endeavouring to understand the possible impact of new technology and to place the right bets Policy makers needing to understand the potentially devastating impact of tech economics and tech politics to make the right decision for their country And above all those of us who care about the future of the human race Technologies to watch Robotics internet of things technologies for the promotion of a sharing economy artificial intelligence 3D printing stem cell research genome sequencing energy storage lasers solar power new materials virtual reality nanotechnology brain interfaces to computers and above all else the internet mixed with computers following the evolutionary trajectory described by Moore's Law **Atlas of Knowledge** Katy

Borner, 2015-03-20 The power of mapping principles for visualizing knowledge illustrated by many stunning large scale full color maps Maps of physical spaces locate us in the world and help us navigate unfamiliar routes Maps of topical spaces help us visualize the extent and structure of our collective knowledge they reveal bursts of activity pathways of ideas and borders that beg to be crossed This book from the author of Atlas of Science describes the power of topical maps providing readers with principles for visualizing knowledge and offering as examples forty large scale and more than 100 small scale full color maps Today data literacy is becoming as important as language literacy Well designed visualizations can rescue us from a sea of data helping us to make sense of information connect ideas and make better decisions in real time In Atlas of Knowledge leading visualization expert Katy Borner makes the case for a systems science approach to science and technology studies and explains different types and levels of analysis Drawing on fifteen years of teaching and tool development she introduces a theoretical framework meant to guide readers through user and task analysis data preparation analysis and visualization visualization deployment and the interpretation of science maps To exemplify the framework the Atlas features striking and enlightening new maps from the popular Places Spaces Mapping Science exhibit that range from Key Events in the Development of the Video Tape Recorder to Mobile Landscapes Location Data from Cell Phones for Urban Analysis to Literary Empires Mapping Temporal and Spatial Settings of Victorian Poetry to Seeing Standards A Visualization of the Metadata Universe She also discusses the possible effect of science maps on the practice of science The Ethics of Invention Sheila Jasanoff, 2016-08-30 We live in a world increasingly governed by technology but to what end Technology rules us as much as laws do It shapes the legal social and ethical environments in which we act Every time we cross a street

drive a car or go to the doctor we submit to the silent power of technology Yet much of the time the influence of technology on our lives goes unchallenged by citizens and our elected representatives In *The Ethics of Invention* renowned scholar Sheila Jasanoff dissects the ways in which we delegate power to technological systems and asks how we might regain control Our embrace of novel technological pathways Jasanoff shows leads to a complex interplay among technology ethics and human rights Inventions like pesticides or GMOs can reduce hunger but can also cause unexpected harm to people and the environment Often as in the case of CFCs creating a hole in the ozone layer it takes decades before we even realize that any damage has been done Advances in biotechnology from GMOs to gene editing have given us tools to tinker with life itself leading some to worry that human dignity and even human nature are under threat But despite many reasons for caution we continue to march heedlessly into ethically troubled waters As Jasanoff ranges across these and other themes she challenges the common assumption that technology is an apolitical and amoral force Technology she masterfully demonstrates can warp the meaning of democracy and citizenship unless we carefully consider how to direct its power rather than let ourselves be shaped by it *The Ethics of Invention* makes a bold argument for a future in which societies work together in open democratic dialogue to debate not only the perils but even more the promises of technology
