Brueggemann, Charles H.

Matthews, 2015-03-12 This book presents a new model the competency framework for students innovators entrepreneurs managers and anyone who wants to better understand the dynamic world of innovation and entrepreneurship Focused on both the individual and strategic organizational level this book is about people and the competencies each person needs to learn to be successful in creating a more dynamic future Matthews and Brueggemann's framework for innovation and entrepreneurship competencies empowers individuals to excel at innovation and new venture creation It provides a practical guide and clear and concise understanding of the knowledge skills attitudes and experiences that are needed to increase

imagination creativity innovation and new venture creation capability Innovation and Entrepreneurship will be attractive for students of entrepreneurship innovation management and cross disciplinary classes such as design thinking Presented in a modular format Innovation Entrepreneurship informs the future direction of people and technology as well as the educational systems producing the next generation of innovators and entrepreneurs Based on extensive academic research this book is organized into two sections Twelve innovation elements and twelve competency categories The elements are the foundation and the competency categories are the building blocks that inform our path toward a more precise understanding of how innovation and entrepreneurship plays an important role in economic development and our daily lives The Gentle Art of Leadership Brian Donovan, Dean Phelan, 2024-11-12 What makes leaders great The writing is on the wall Quantitative and qualitative research indicate they consistently practise a Gentle Art of Leadership Firsthand analyses of more than six thousand 360o feedback reports Over 50 one on one interviews with Leaders Reflections on hundreds of Executive Coaching sessions Review of over 160 books and articles on leadership Our own experiences as CEOs A compelling guide and handbook for anyone in a leadership role This Gentle Art of Leadership cuts against the grain of the often held view that great leaders CEOs and team coaches are charismatic extroverted forceful characters with powerful egos and that we need such big personalities to transform our companies organisations sporting teams and nations Sometimes this view proves to be true and we remember such characters But more often the greatest leaders who leave the greatest legacies have a powerful mixture of personal humility integrity and indomitable will for forwarding the health success and long term prosperity of their organisation and people They seem to get the best out of others by genuinely treating them with dignity and respect whilst focused on strategic outcomes Built to Last, 2011 **Good to Great** Jim Collins, 2011-07-19 The Challenge Built to Last the defining management study of the nineties showed how great companies triumph over time and how long term sustained performance can be engineered into the DNA of an enterprise from the very beginning But what about the company that is not born with great DNA How can good companies mediocre companies even bad companies achieve enduring greatness The Study For years this question preyed on the mind of Jim Collins Are there companies that defy gravity and convert long term mediocrity or worse into long term superiority And if so what are the universal distinguishing characteristics that cause a company to go from good to great The Standards Using tough benchmarks Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years How great After the leap the good to great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years better than twice the results delivered by a composite index of the world s greatest companies including Coca Cola Intel General Electric and Merck The Comparisons The research team contrasted the good to great companies with a carefully selected set of comparison companies that failed to make the leap from good to great What was different Why did one set of companies become truly great performers while the other set

remained only good Over five years the team analyzed the histories of all twenty eight companies in the study After sifting through mountains of data and thousands of pages of interviews Collins and his crew discovered the key determinants of greatness why some companies make the leap and others don t The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice The findings include Level 5 Leaders The research team was shocked to discover the type of leadership required to achieve greatness The Hedgehog Concept Simplicity within the Three Circles To go from good to great requires transcending the curse of competence A Culture of Discipline When you combine a culture of discipline with an ethic of entrepreneurship you get the magical alchemy of great results Technology Accelerators Good to great companies think differently about the role of technology The Flywheel and the Doom Loop Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap Some of the key concepts discerned in the study comments Jim Collins fly in the face of our modern business culture and will quite frankly upset some people Perhaps but who can afford to ignore these findings
