## **Marienthal The Sociography Of An Unemployed Community:**

Marienthal Marie Jahoda,Hans Zeisel, The study on which Marienthal is based was conducted in 1930 in Austria at the time of a depression that was worse than anything experienced in the United States But the substantive problem is still very much with us although our focus is now poverty rather than unemployment In Austria the institutional response to mass unemployment was the dole Unlike the work relief programs of the New Deal the dole system left workers destitute and idle The essential finding of this research is that when people are deprived of work there is a breakdown in the personality structure of a group Marienthal represents a colossal breakthrough in social research It provides a combination of quantification and interpretive analysis of qualitative material an approach that remains in the forefront of present day research design The work combines statistical data at hand case studies information on historical background of those being studied and questionnaires combined with solicited reports that enhance a sense of daily life without intrusion by investigators The work provides a unique insight into how creative innovations can assist in overcoming collective deprivations
