**Handbook of Research Methods for Tourism and Hospitality Management** Robin Nunkoo, 2018-07-27 As research in tourism and hospitality reaches maturity a growing number of methodological approaches are being utilized and in addition this knowledge is dispersed across a wide range of journals Consequently there is a broad and multidisciplinary community of tourism and hospitality researchers whom at present need to look widely for support on methods In this volume researchers fulfil a pressing need by clearly presenting methodological issues within tourism and hospitality research alongside particular methods and share their experiences of what works what does not work and where challenges and innovations lie Marketing Theory and Applications William L. Cron, George S. Low, 2004 Learner-Centered Teaching Terry Doyle, 2023-07-03 This book presents the research based case that Learner Centered Teaching LCT offers the best means to optimize student learning in college and offers examples and ideas for putting it into practice as well the underlying rationale It also starts from the premise that many faculty are much closer to being learner centered teachers than they think but don't have the full conceptual understanding of the process to achieve its full impact There is sometimes a gap between what we would like to achieve in our teaching and the knowledge and strategies needed to make it happen LCT keeps all of the good features of a teacher centered approach and applies them in ways that are in better harmony with how our brains learn It for instance embraces the teacher as expert as well as the appropriate use of lecture while also offering new effective ways to replace practices that don't optimizing student learning Neuroscience biology and cognitive science research have made it clear that it is the one who does the work who does the learning Many faculty do too much of the work for their students which results in diminished student learning To enable faculty to navigate this shift Terry Doyle presents an LCT based approach to course design that draws on current brain research on cognition and learning on addressing the affective concerns of students on proven approaches to improve student's comprehension and recall on transitioning from teller of knowledge to a facilitator of learning on the design of authentic assessment strategies such as engaging students in learning experiences that model the real world work they will be asked to do when they graduate and on successful communication techniques The presentation is informed by the questions and concerns raised by faculty from over sixty colleges with whom Terry Doyle has worked and on the response from an equal number of regional national and international conferences at which he has presented on topics related to LCT Subject Guide to Books in Print, 2001 Marketing Research Essentials Carl McDaniel, Jr., Roger Gates, 2016-01-11 In Marketing Research Essentials 9th Edition authors Carl McDaniel and Roger Gates share their industry experience to teach students how to make critical business decisions through the study of market research Designed for marketing research courses the authors practical applications based approach features Real Data Real People and Real Research to prepare students to conduct and use market research for future careers in business Co author Roger Gates President of DSS Research infuses the text with a practitioner perspective helping students learn how
