Prescott, John P. Harley, Donald A. Klein, 2005 Prescott Harley and Klein's 6th edition provides a balanced comprehensive introduction to all major areas of microbiology. Because of this balance, Microbiology 6e is appropriate for students preparing for careers in medicine, dentistry, nursing, and allied health, as well as research, teaching, and industry. Biology and chemistry are prerequisites. (WCS) *Microbiology 5th Edition W/eGrade Plus Set* Jacquelyn G. Black, 2002-09-04 **Microbiological Reviews**, 1988 *Essential Concepts for Healthy Living* Sandra Alters, Wendy Schiff, 1998 Capturing the essence of healthy living, this book provides practical applications and personal strategies along with concepts grounded in scientific research to achieve a balance between science and the real world. Topics backed by research, including a chapter devoted to violence, provide students with an overview of today's health issues. *Food Processing Technologies* Amit K. Jaiswal, 2016-08-05 The processing of food generally implies the transformation of the perishable raw food to value-added products. It imparts benefits such as the destruction of surface microflora and inactivation of deleterious enzymes such as peroxidase, leading to a greater shelf life of the food. It also enhances color and texture while maintaining quality of products and makes them edible. However, it also has an inevitable impact on nutritional quality attributes such as increase or decrease in certain vitamins and bioactive metabolites among others. *Food Processing Technologies: Impact on Product Attributes* covers a range of food processing technologies and their effect on various food product attributes such as bioactive compounds, safety, and sensory and nutritional aspects of the food upon processing. There are eight major parts in the book. Part I covers the conventional processing technologies. Parts II, III, IV, and V deal with various novel processing technologies including impingement processing technologies, electro-magnetic processing technologies, physico-mechanical processing technologies, and electro-technologies. Part VI introduces chemical processing technologies. Part VII comprises irradiation processing technology, and the final part is focused on biological processing technology, detailing the application of enzymes in food processing. Numerous studies were carried out to find the impact of these processing technologies on various aspects of food and associated health promotion properties. Both positive and negative results were obtained based on nature of foods, processing type, and duration of processing, and this book covers these results in depth. *The United States Catalog*, 1953 National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1992 *Foundations in Microbiology 5th.
