Management Accounting Research (RLE Accounting) Charles F. Klemstine, Michael W. Maher, 2014-02-05 This bibliography presents a review of trends in management accounting research and a classified annotated listing of over 600 works in the area. It is intended to help the accounting researcher or student who wishes to review the development of the literature in management accounting over many years. The book traces this development from 1926 to 1982 through the primary academic journals. This review has focussed on accounting literature and includes only those works from outside the accounting literature that were seminal in defining and introducing a research area and were frequently referenced in the accounting literature. Management Accounting, Organizational Theory and Capital Budgeting: 3 Surveys Robert W. Scapens, 1984-11-19

Handbook of Management Accounting Research Christopher S. Chapman, Anthony G. Hopwood, Michael D. Shields, 2011-09-14 Volume two of the Handbooks of Management Accounting Research consists of two groups of chapters. The first draw together research that has focussed on particular management accounting practices. The second set synthesise contributions to the literature that have been focussed within particular organisational contexts. Volume two concludes with a review of research on how management accounting practice and research varies around the world. Special pricing available if purchased as a set with Volume 1. Managerial Accounting Ramji Balakrishnan, Konduru Sivaramakrishnan, Geoffrey B. Sprinkle, 2008-11-10 Most managerial accounting texts emphasize the mechanics of managerial accounting. While important mechanics are not enough to solve business problems, students need to understand how managerial accounting can improve decision making and when and where a particular tool or technique is appropriate. Balakrishnan's *Managerial Accounting* 1st edition presents accounting information in the context of business decision making. It combines the traditional topics of managerial accounting with a strategic framework that shows students how to construct decision models and measure information. By linking business decisions with accounting information, students will be motivated to learn and make more informed decisions. Balakrishnan will appeal to courses where there is a true focus on decision making and accounting is placed within a business context.

Heuristic Reasoning in Management Accounting Jörn Sebastian Basel, Jörn Basel, 2012 Heuristics are short cuts and deliberately ignore information for instance through examining fewer cues or integrating less information. However, this collides with a view on management accountants and controllers as rational agents which seems to suggest that all available information should be considered. As their role as information supplier is often accompanied with the task to assist managers in their judgment and decision making, they have huge influence on these processes. Therefore, it is of high relevance to know if how and which heuristics management accountants and controllers use. Furthermore, we need to know which individual and situational factors influence their usage of heuristics. With a series of five empirical studies applying a mixed methods research design, the

author sheds light to these research questions and addresses some central claims of the potential biases but also the stunning benefits of relying on heuristic reasoning Central to his discussion are dual process approaches which are debated in cognitive psychology Scholars of these approaches claim that we should distinguish between two distinct processes or systems of the human mind Following this interpretation heuristics are processes which are described as intuitive automatic fast and unconscious They are routinized cognitive processes which are based on experience in certain social environments and thus often exhibit ecological rationality Overall this book picks up an up to date topic in behavioural accounting research which not only is of relevance for researchers but as well for practitioners
