Wallace,William H. Sperber,Sara E. Mortimore,2011-06-09 The HACCP Hazard Analysis and Critical Control Points system is still recognised internationally as the most effective way to produce safe food throughout the supply chain but a HACCP system cannot operate in a vacuum It requires prerequisite programmes to be in place and it can be highly affected by or dependent upon other major considerations such as animal plant human and environmental health food security and food defence This book Provides a practical and up to date text covering the essentials of food safety management in the global supply chain giving the reader the knowledge and skills that they need to design implement and maintain a world class food safety programme Builds on existing texts on HACCP and food safety taking the next step forward in the evolution of HACCP and providing a text that is relevant to all sectors and sizes of food businesses throughout the world Shares practical food safety experience allowing development of best practice approaches This will allow existing businesses to improve their systems and enable businesses that are new to HACCP and food safety management requirements in both developed and developing countries to build on existing knowledge for more rapid application of world class food safety systems Educates practitioners such that they will be able to use their judgement in decision making and to influence those who make food policy and manage food operations This book is an essential resource for all scientists and managers in the food industry manufacturing and foodservice regulators and educators in the field of food safety and students of food science and technology *Food Safety Culture* Frank Yiannas,2008-12-10 Food safety awareness is at an all time high new and emerging threats to the food supply are being recognized and consumers are eating more and more meals prepared outside of the home Accordingly retail and foodservice establishments as well as food producers at all levels of the food production chain have a growing responsibility to ensure that proper food safety and sanitation practices are followed thereby safeguarding the health of their guests and customers Achieving food safety success in this changing environment requires going beyond traditional training testing and inspectional approaches to managing risks It requires a better understanding of organizational culture and the human dimensions of food safety To improve the food safety performance of a retail or foodservice establishment an organization with thousands of employees or a local community you must change the way people do things You must change their behavior In fact simply put food safety equals behavior When viewed from these lenses one of the most common contributing causes of food borne disease is unsafe behavior such as improper hand washing

cross contamination or undercooking food Thus to improve food safety we need to better integrate food science with behavioral science and use a systems based approach to managing food safety risk The importance of organizational culture human behavior and systems thinking is well documented in the occupational safety and health fields However significant contributions to the scientific literature on these topics are noticeably absent in the field of food safety **Journal of the American Dietetic Association** ,2001 **Applied Foodservice Sanitation** ,1993 **Applied Foodservice Sanitation Coursebook** F.
