Mankiw Chapter 26:

Combating Inequality Olivier Blanchard, Dani Rodrik, 2023-08-15 Leading economists and policymakers consider what economic tools are most effective in reversing the rise in inequality Economic inequality is the defining issue of our time In the United States the wealth share of the top 1% has risen from 25% in the late 1970s to around 40% today The percentage of children earning more than their parents has fallen from 90% in the 1940s to around 50% today In Combating Inequality leading economists many of them current or former policymakers bring good news we have the tools to reverse the rise in inequality In their discussions they consider which of these tools are the most effective at doing so The contributors express widespread agreement that we need to aim policies at economic inequality itself deregulation and economic stimulus will not do the job No longer does anyone ask in relation to expanded social programs Can we pay for it And most believe that US taxes will have to rise although they debate whether the progressivity should focus on the revenue side or the expenditure side through broad based taxes like the VAT or through a wealth tax aimed at the very top of the income scale They also consider the philosophical aspects of inequality whether it is bad in itself or because of its consequences the risks and benefits of more radical interventions to change the nature of production and trade and future policy directions Contributors Daron Acemoglu Philippe Aghion Danielle Allen Ben Ansell David Autor Sheri Berman Marianne Bertrand Olivier Blanchard Lucas Chancel William Darity Jr Peter Diamond Christian Dustmann David T Ellwood Richard Freeman Caroline Freund Jason Furman Hilary Hoynes Lawrence F Katz Wojciech Kopczuk N Gregory Mankiw Nolan McCarty Dani Rodrik Jesse Rothstein Emmanuel Saez T M Scanlon Heidi Shierholz Tharman Shanmugaratnam Stefanie Stantcheva Michael Stynes Laura D Andrea Tyson Philippe Van Parijs Gabriel Zucman

The Climate Casino William Nordhaus, 2013-10-22 Climate change is profoundly altering our world in ways that pose major risks to human societies and natural systems We have entered the Climate Casino and are rolling the global warming dice warns economist William Nordhaus But there is still time to turn around and walk back out of the casino and in this essential book the author explains how div DIVdiv Bringing together all the important issues surrounding the climate debate Nordhaus describes the science economics and politics involved and the steps necessary to reduce the perils of global warming Using language accessible to any concerned citizen and taking care to present different points of view fairly he discusses the problem from start to finish from the beginning where warming originates in our personal energy use to the end where societies employ regulations or taxes or subsidies to slow the emissions of gases responsible for climate change DIVdiv DIVdiv Nordhaus offers a new analysis of why earlier policies such as the Kyoto Protocol failed to slow carbon dioxide emissions how new approaches can succeed and which policy tools will most effectively reduce emissions In short he clarifies a defining problem of our times and lays out the next critical steps for slowing the trajectory of global warming DIV

Sg-Principles of Macroeconomics David R. Hakes, N. Gregory Mankiw, 1998 **Economics and Climate Emergency**

Barry Gills, Jamie Morgan, 2022-08-22 This book explores a series of connected themes focused on the role economics and other influential forms of theory and thinking have played in creating the current predicament and the scope for alternatives and how they might be framed Thirty years have passed since the inception of the United Nations Framework Convention on Climate Change UNFCCC and the beginning of policy on climate change Thirty wasted years To most politicians long term collective interest has been denominated in meaningless units of time a never and forever that has continually delayed action From complacency has come potential disaster and we are now living in a time of climate emergency and ecological breakdown The next decade is a pivotal period requiring fundamental change But numerous impediments remain Continual material energy and economic growth on a planetary scale are manifestly impossible and yet economic theory takes these as a given and political leadership and policy seem unwilling to accept brute reality Instead they offer a series of implausible commitments and pledges rooted in technofixes without addressing the fundamental drivers of the problems the world faces The edited volume explores the issues and offers a variety of ways to think through the problems at hand from postgrowth

degrowth and social ecological economics to policy assemblage and transversalism The chapters in this book were originally published in the journal Globalizations *Principles Econ Games Manual* N.
