

H&M GROUP PRODUCT QUALITY INSPECTION MANUAL

*Routine for how to make an inspection and maintain the Suppliers
Product Quality – all product groups*

Introduction

This document clarifies the routine for how to make inspection that should be used by H&M Group Quality Developers/ Controllers, Nominated Quality Controllers, Supplier and 3rd party Quality Controllers.

The purpose of quality control is to pinpoint the production operations which need special attention and find long term solutions to prevent defects from repeating in the future. By working proactively, the defects will be found at an early stage of production or be prevented before bulk production starts.

In order to reach the best quality, the following inspections and activities should be performed and attended by either H&M Quality Controllers/ Developers/ Product Technicians/ the Nominated Quality Controllers or both parties.

- Quality System Follow up - Information handover
- Hand Over from Sample Handling
- Pre-Production Meeting / Trial Production Meeting (FB8)
- Pilot Production / Trial Production (FB8)
- Initial Inspection
- Inline Inspection
- Final Inspection

The QC/QD/NQC should always be alert to Sustainability and if any problem is noticed, the information should be forwarded to the Sustainability team.
