Cuzzocrea, 2015-09-15 As today's organizations are capturing exponentially larger amounts of data than ever now is the time
for organizations to rethink how they digest that data Through advanced algorithms and analytics techniques organizations
can harness this data discover hidden patterns and use the newly acquired knowledge to achieve competitive advantages
Presenting the contributions of leading experts in their respective fields Big Data Algorithms Analytics and Applications
bridges the gap between the vastness of Big Data and the appropriate computational methods for scientific and social
discovery It covers fundamental issues about Big Data including efficient algorithmic methods to process data better
analytical strategies to digest data and representative applications in diverse fields such as medicine science and engineering
The book is organized into five main sections Big Data Management considers the research issues related to the management
of Big Data including indexing and scalability aspects Big Data Processing addresses the problem of processing Big Data
across a wide range of resource intensive computational settings Big Data Stream Techniques and Algorithms explores
research issues regarding the management and mining of Big Data in streaming environments Big Data Privacy focuses on
models techniques and algorithms for preserving Big Data privacy Big Data Applications illustrates practical applications of
Big Data across several domains including finance multimedia tools biometrics and satellite Big Data processing Overall the
book reports on state of the art studies and achievements in algorithms analytics and applications of Big Data It provides
readers with the basis for further efforts in this challenging scientific field that will play a leading role in next generation
database data warehousing data mining and cloud computing research It also explores related applications in diverse sectors

covering technologies for media data communication elastic media data storage cross network media data fusion and SaaS

Emerging Smart Technologies for Critical Infrastructure Shantanu Pal,Zahra Jadidi,Ernest Foo,Subhas C.

Mukhopadhyay,2023-06-01 This book highlights the latest advancements innovation technology and real world challenges and solutions related to smart critical infrastructure In addition it provides quantitative and qualitative research innovations to individual academic organizational and industry practitioners in a wide range of practical solutions using emerging technologies in areas such as smart sensing data acquisition data analytics data processing and other related topics such as security privacy and trust to devices users and the systems Finally the book discusses the various societal applications using the Internet of Things and emerging technologies As such it offers an essential reference guide about the latest design and development in critical infrastructure for academia and industry Fully explaining all the techniques used the book is of interest to engineers researchers and scientists working in wireless sensor networks Internet of Things systems and emerging technologies
