Too Big to Jail Brandon Garrett, 2014-11-03 American courts routinely hand down harsh sentences to individual convicts but a very different standard of justice applies to corporations Too Big to Jail takes readers into a complex compromised world of backroom deals for an unprecedented look at what happens when criminal charges are brought against a major company in the United States Federal prosecutors benefit from expansive statutes that allow an entire firm to be held liable for a crime by a single employee But when prosecutors target the Goliaths of the corporate world they find themselves at a huge disadvantage The government that bailed out corporations considered too economically important to fail also negotiates settlements permitting giant firms to avoid the consequences of criminal convictions Presenting detailed data from more than a decade of federal cases Brandon Garrett reveals a pattern of negotiation and settlement in which prosecutors demand admissions of wrongdoing impose penalties and require structural reforms However those reforms are usually vaguely defined Many companies pay no criminal fine and even the biggest blockbuster payments are often greatly reduced While companies must cooperate in the investigations high level employees tend to get off scot free The practical reality is that when prosecutors face Hydra headed corporate defendants prepared to spend hundreds of millions on lawyers such agreements may be the only way to get any result at all Too Big to Jail describes concrete ways to improve corporate law enforcement by insisting on more stringent prosecution agreements ongoing judicial review and greater transparency

Challenges in the Field of Economic and Financial Crime in Europe and the US Katalin Ligeti, Vanessa Franssen, 2017-02-23 In the past few years criminal justice systems have faced important global challenges in the field of economic and financial crime The 2008 financial crisis revealed how strongly financial markets and economies are interconnected and illustrated that misconduct in the economic and financial sectors is often of a systemic nature with wide spread consequences for a large number of victims The prevention control and punishment of such crimes is thus confronted with a strong globalisation Moreover continuous technological evolutions and socio economic developments make the distinction between socially desirable and undesirable behaviour more problematic Besides economic and financial

misconduct is notoriously difficult to detect and investigate In light of these challenges legislators and law enforcers have been searching for adequate responses to combat economic and financial crime by adapting existing policies norms and practices and by creating new enforcement mechanisms The purpose of this volume is to analyse those challenges in the field of economic and financial crime from different perspectives and to examine which particular solutions criminal justice systems across Europe give to those challenges The volume has four parts The first part focuses on a number of key questions with respect to substantive criminal law whereas the second part will address issues affecting the administration of justice and criminal procedure Part three then explores particular challenges concerning multi agency cooperation and multi disciplinary investigations Finally part four will concentrate on issues regarding shared or integrated enforcement models
