

Measuring Ground Resistance using Megger

Current Spike Set between 30m & 50m.

Potential Spike set in Line & Equidistant between Electrode/Rod and Test & the Current Spike.

Set the Potential Spike at 62% of the Distance between Electrode/Rod under Test & the Current Spike.

Messung Instructions Manual

Guy Montrose Whipple

Messung Instructions Manual:

Unbuilt Utopian Cities 1460 to 1900: Reconstructing their Architecture and Political Philosophy Tessa Morrison, 2016-03-09 Bringing together ten utopian works that mark important points in the history and an evolution in social and political philosophies this book not only reflects on the texts and their political philosophy and implications but also their architecture and how that architecture informs the political philosophy or social agenda that the author intended Each of the ten authors expressed their theory through concepts of community and utopian architecture but each featured an architectural solution at the centre of their social and political philosophy as none of the cities were ever built they have remained as utopian literature Some of the works examined are very well known such as Tommaso Campanella's *Civitas Solis* while others such as Joseph Michael Gandy's *Designs for Cottages* are relatively obscure However even with the best known works this volume offers new insights by focusing on the architecture of the cities and how that architecture represents the author's political philosophy It reconstructs the cities through a 3 D computer program ArchiCAD using Artlantis to render Plans sections elevations and perspectives are presented for each of the cities The ten cities are Filarete Sforzina Albrecht Dürer Fortified Utopia Tommaso Campanella The City of the Sun Johann Valentin Andreae Christianopolis Joseph Michael Gandy An Agricultural Village Robert Owen Villages of Unity and Cooperation James Silk Buckingham Victoria Robert Pemberton Queen Victoria Town King Camp Gillette Metropolis and Bradford Peck The World a Department Store Each chapter considers the work in conjunction with contemporary thought the political philosophy and the reconstruction of the city Although these ten cities represent over 500 years of utopian and political thought they are an interlinked thread that had been drawn from literature of the past and informed by contemporary thought and society The book is structured in two parts

From Lived Experience to the Written Word Pamela H. Smith, 2022-09-30 How and why early modern European artisans began to record their knowledge In *From Lived Experience to the Written Word* Pamela H Smith considers how and why beginning in 1400 CE European craftspeople began to write down their making practices Rather than simply passing along knowledge in the workshop these literate artisans chose to publish handbooks guides treatises tip sheets graphs and recipe books sparking early technical writing and laying the groundwork for how we think about scientific knowledge today Focusing on metalworking from 1400 1800 CE Smith looks at the nature of craft knowledge and skill studying present day and historical practices objects recipes and artisanal manuals From these sources she considers how we can reconstruct centuries of largely lost knowledge In doing so she aims not only to unearth the techniques material processes and embodied experience of the past but also to gain insight into the lifeworld of artisans and their understandings of matter
