experiments: pt. 1. Students' manual Edward Bradford Titchener,1905 The general purpose with which this book has
been written is sufficiently indicated by its title I have selected a number of the classical experiments of Experimental
Psychology and have tried to present them in such a way that their performance shall have a real disciplinary value for the
undergraduate student Within this general purpose my aim has been two fold I have sought to show in the first place that
psychology is above the laboratory that we employ our instruments of precision not for their own sake but solely because
they help us to a refined and more accurate introspection And secondly just as in my Outline of Psychology and Primer of
Psychology I gave the results of experimentation a prominent place in the psychological system so here I have treated the
selected experiments not as separate exercises but as points of departure for systematic discussion PsycINFO Database
