Malingering, Feigning, and Response Bias in Psychiatric/ Psychological Injury Gerald Young, 2014-02-11 This book is a comprehensive analysis of the definitions concepts and recent research on malingering feigning and other response biases in psychological injury forensic disability populations. It presents a new model of malingering and related biases and develops a diagnostic system based on it that is applicable to PTSD chronic pain and TBI Included are suggestions for effective practice and future research based on the literature reviews and the new systems which are useful also because they can be used readily by psychiatrists as much as psychologists In Malingering Feigning and Response Style Assessment in Psychiatric Psychological Injury Dr Young ambitiously sets out to articulate and synthesize the polarities involved in the assessment of response styles in psychological disabilities including PTSD pain and TBI He does so thoroughly and very even handedly neither minimizing the degree that outright faking can be found in substantial numbers of examinees nor disregarding the possibility that there can be causes for validity test failure other than malingering He reviews the prior systems for classifying evidence of malingering and proposes his own criteria for feigned PTSD These are conservative and well grounded in the prior literature Finally the book contains dozens of very recent references giving testament to Dr Young s immersion in the personal injury literature as might be expected from his experience as founder and Editor in Chief for Psychological Injury and the Law Reviewer Steve Rubenzer Ph D ABPP Board Certified Forensic Psychologist Harris' <u>Developmental Neuropsychiatry</u> James C.
