**Financial Management in Construction Contracting** Andrew Ross, Peter Williams, 2013-01-29 Financial Management in Construction Contracting Andrew Ross Peter Williams This authoritative text provides a detailed insight into how construction companies manage their finances at both corporate and project level It guides students and practitioners through the complexities of the financial reporting of construction projects within the constraints of accepted accounting practice The book is written for non

accountants and from a contractor's perspective and is equally relevant to subcontractors and main contractors. The authors examine the relationship between the external annual accounts and the internal cost value reconciliation process. CVR is covered in depth and the authors consider issues such as interim payments, subcontract accounts, contractual claims, final accounts, cash flow management and the reporting of the physical and financial progress of contracts. A broad perspective of all the financial aspects of contracting is taken along with related legal issues and the authors explain how things operate in the real world. They describe good practice in financial control while at the same time being honest about some of the more questionable practices that can and do happen. The approach taken is unique as the financial management of construction projects is considered from the perspective of the contractor's quantity surveyor. The book deals with the real issues that surveyors have to address when using their judgment to report turnover, profitability, cash flow and work in progress on projects and the financial problems faced by subcontractors are frankly and pragmatically explored. The payment and notice requirements of the Construction Act are explained in detail and relevant provisions of JCT2011, NEC3, ICC, DOM 1 and other standard contracts and subcontracts are also covered. Financial Management in Construction Contracting addresses the wide variety of external factors that influence how construction companies operate including government policy, banking covenants and the financial aspects of supply chain management. Cost reporting systems are described and real life examples are used to illustrate cost reports, accrual systems and how computerised systems can be employed to provide the QS with information that can be audited. This is the ideal core text for final year degree and post graduate students and provides an invaluable reference source for all engaged in the financial management of construction projects. This book's companion website is at [www.wiley.com/go/rossfinancialmanagement](http://www.wiley.com/go/rossfinancialmanagement) and offers invaluable resources for both students and lecturers. PowerPoint slides for lectures on each chapter, Excel worksheets to practice what you learn, sample valuations and cashflows.

*MacRoberts on Scottish Construction Contracts* MacRoberts, 2014-11-17. Provides a guide to the general principles of Scottish law relevant to construction contracts and the main provisions of the standard forms of construction contract used in Scotland including the obligations of employers and contractors, certification, payment, ending a construction contract, remedies, subcontracts, collateral warranties, insurance, dispute resolution, regulatory matters. The new edition has been substantially updated and expanded to take account of the latest editions of the Scottish Standard Building Contracts and recent case law. Specific updates have been driven by the following changes to legislation and standard contracts: Local Democracy, Economic Development and Construction Act 2009 and the relative Scheme for Construction Contracts; Arbitration (Scotland) Act 2010. Recognising the significant increase in use of NEC3 standard forms of contract, references to NEC3 provisions have been introduced throughout the relevant chapters so that each now covers the common law, the SBCC provisions and the NEC3 provisions. It also features new chapters on litigation, competition, the Bribery Act 2010 and guarantees and bonds. From reviews of previous editions: very approachable and readable. I would particularly recommend
