Chinese Investment in Africa Freedom Mazwi, George T. Mudimu, Kirk Helliker, 2024-03-01 This edited volume systematically interrogates the Chinese investment presence in Africa focusing on land and agriculture mining and other infrastructural projects In doing so the form and extent of Chinese debt will be brought into perspective with comparisons made to investments in Africa emanating from metropolitan capitalism The volume examines the development potential of these investments by focusing on the labour regimes created and the effects of investments on the land based agricultural livelihoods of the African peasantry This entails the use of a political economy approach which incorporates the state international actors and local communities into the analysis with gender dynamics also of great significance Overall the contributions in this volume focus on an array of African nations with a specific focus on Zimbabwe and they deploy a large wealth of primary field based data collected over a number of years by established and emerging scholars living and working on the continent

**Interest Groups, Water Politics and Governance** Richard Meissner, 2015-07-08 The book investigates the role interest groups have played over the years to influence the governments of Lesotho and South Africa the World Bank and project implementation authorities in changing some policy aspects of the Lesotho Highlands Water Project LHWP Some of the issues being agitated by the interest groups are the resettlement of villagers where some of the dams for the projects are being constructed The author argues that interest groups and individuals have the ability to influence the above mentioned institutions and to such an extent that water politics and governance is not the domain of state institutions only

**Political Ecology of African Peace Parks** Maano Ramutsindela, 2025-11-06 Peace parks are imagined landscapes and seascapes created through narratives and science This book uses a political ecology framework to explore the colonial and uneven geography of peace parks in post independence Africa It illuminates the regional milieus impacting these parks and the consequent socioecological and political dynamics This book curates a space for multiple voices and knowledges of peace parks and highlights the limits to truth claims It presents peace parks as a milieu that enables the assemblage of underexamined concepts in political ecology The book advances four arguments The first is that critical scholarship on the peace parks initiative in Africa and elsewhere has been crowded out by a dominant and well sponsored narrative of these parks Second the ideology of peace parks capitalises on societal aspirations and challenges to wage the war of the mind Third peace parks are a geographical expression of coloniality The fourth argument is that the regional dynamics account for the uneven geography of peace parks in Africa These dynamics reveal the symbiotic relations between politics and ecology The founding of peace parks animates resource politics but also depoliticises the resource question Situated in the ongoing debates on protecting the planet in an unequal world and the pathways for a just society this book will be of interest to researchers of African studies political ecology human geography sociology environmental studies and political science
