Linguistic Diversity In Space And Time:

Linguistic Diversity in Space and Time Johanna Nichols, 1992-09 Some structural features of languages predict others some remain unchanged in daughter languages others have an areal consistency in establishing typologically historically and geographically stable features in the world's languages examples are included from Kayardild Djingili Dyirbal Mangarayi Maung Ngiyambaa *Space and Time in Languages and Cultures* Luna Filipović, Kasia M. Jaszczolt, 2012-07-24 This volume offers novel insights into linguistic diversity in the domains of spatial and temporal reference searching for uniformity amongst diversity A number of authors discuss expression of dynamic spatial relations cross linguistically in a vast range of typologically different languages such as Bezhta French Hinuq Italian Japanese Polish Serbian and Spanish among others The contributions on linguistic expression of time all shed new light on pertinent questions regarding this cognitive domain such as the hotly debated relationship between cross linguistic differences in talking about time and universal principles of utterance interpretation modelling temporal inference through aspectual interactions as well as the complexity of the acquisition of tense aspect relations in a second language The topic of space and time in language and culture is also represented from a different point of view in the sister volume *Space and Time in Languages and Cultures* Language culture and cognition HCP 37 which discusses spatial and temporal constructs in human language cognition and culture in order to come closer to a better understanding of the interaction between shared and individual characteristics of language and culture that shape the way people interact with each other and exchange information about the spatio temporal constructs that underlie their cognitive social and linguistic foundations **Linguistic Diversity in Space and Time** Johanna Nichols, 2018-12-14 In this ground breaking book Johanna Nichols proposes means of describing comparing and interpreting linguistic diversity both genetic and structural providing the foundations for a theory of diversity based upon population science This book will interest linguists archaeologists and population specialists An awe inspiring book unequalled in scope originality and the range of language data considered Anna Siewierska *Linguistics Fascinating* A brilliant pioneering study *Journal of Indo European Studies* A superbly reasoned book John A C Greppin *Times Literary Supplement* [Book Review](#) Jeffrey Heath, 1994 Using models from dialect geography and population genetics Nichols links Australian colonization from the Old World on the basis of typological distributions *Space and Time in Languages and Cultures* Luna Filipović, 2012 *Space-Time (Dis)continuities in the Linguistic Landscape* Isabelle Buchstaller, Małgorzata Fabiszak, Melody Ann Ross, 2024-03-27 This collection spotlights the diachronic dimensions of the linguistic landscape the importance of exploring temporal dissonances in historical events in order to better understand semiotic political and social transformations across different communities over the last century The volume seeks to expand the current borders of linguistic landscape LL research by situating the analysis of signs in the LL within their time space organization which has been understudied in existing scholarship The book featuring chapters from established and emerging scholars argues that a focus on the

historicity of the city text can reveal unique insights into the role of semiotic processes as precursors and support mechanisms for political and social changes The collection is structured around different temporal clusters and geographic contexts across the globe where shorter and longer waves of politically driven resemioticization can be most sharply observed post colonial communities post communist societies and recent and current sociopolitical upheavals Taken together the volume proposes a kaleidoscope view of the complex temporalities that underpin multimodal discourses in contested public spaces offering new directions for LL research This book will be of interest to students and scholars in sociolinguistics discourse analysis semiotics visual anthropology and political science The Introduction and Chapter 8 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY-NC-ND 4.0 license
