The Lost History of "Talking to Computers" William Meisel, 2025-03-17 Much science fiction has humans talking to computers an early example being HAL in the movie 2001 in 1968 That vision motivated many people to attempt making the imagined technology real including the author who founded a company developing speech recognition technology in the 1980s Speech recognition was an early part of Artificial Intelligence computers doing a task that had previously been exclusive to humans and proved to be more difficult than early pioneers expected The Lost History of Talking to Computers documents 27 years of those efforts the source of the history is the author's 309 monthly issues of a newsletter tracking the hundreds of companies trying to make a business out of this challenging technology Today we talk to computers frequently on our smartphones e.g. Apple's Siri or Google Assistant or to a home speaker e.g. Amazon's Alexa and often when we telephone a customer service number Most doctors use computer transcription of their notes for Electronic Healthcare Systems Speech recognition is teaching how to speak a new language and finding specific content in a video file How did we get here and where will it take us What can we learn from this history that has implications for the huge investments in more general AI today Readers will be amazed at how many companies were inspired by this challenge beginning more than three decades ago

Designing Interaction and Interfaces for Automated Vehicles Neville Stanton, Kirsten M. A. Revell, Patrick Langdon, 2021-03-10 Driving automation and autonomy are already upon us and the problems that were predicted twenty

years ago are beginning to appear These problems include shortfalls in expected benefits equipment unreliability driver skill fade and error inducing equipment designs Designing Interaction and Interfaces for Automated Vehicles User Centred Ecological Design and Testing investigates the difficult problem of how to interface drivers with automated vehicles by offering an inclusive human centred design process that focusses on human variability and capability in interaction with interfaces This book introduces a novel method that combines both systems thinking and inclusive user centred design It models driver interaction provides design specifications concept designs and the results of studies in simulators on the test track and in road going vehicles This book is for designers of systems interfaces interactions UX Human Factors and Ergonomics researchers and practitioners involved with systems engineering and automotive academics _ In this book Prof Stanton and colleagues show how Human Factors methods can be applied to the tricky problem of interfacing human drivers with vehicle automation They have developed an approach to designing the human automation interaction for the handovers between the driver and the vehicle This approach has been tested in driving simulators and most interestingly in real vehicles on British motorways The approach called User Centred Ecological Interface Design has been validated against driver behaviour and used to support their ongoing work on vehicle automation I highly recommend this book for anyone interested or involved in designing human automation interaction in vehicles and beyond Professor Michael A Regan

University of NSW Sydney AUSTRALIA **Urban Movements and Climate Change** Marco Armiero,Salvatore Paolo Rosa,Ethemcan Turhan,2025-10-01 From the social uprisings in Santiago de Chile to the radical municipalism experiments in Naples this volume takes the reader on an intellectual journey at the frontlines across global South and global North where climate breakdown meets social innovations While the effects of the climate crisis are becoming more extreme and tangible across the globe with every passing day urban social movements and their radical strategies to resist climate injustice often remain concealed from sight Contributors to this volume ask how would it be to look at the politics of urban loss and damage not from the highly securitized zones of climate summits but from favelas in Rio de Janeiro flood prone communities in S o Paulo urban gardens in Naples or neighborhoods resisting climate gentrification in New York City This book explores diverse worlds and praxis of urban social movements resisting the rising tides of climate crisis and social injustice **Federal**
