Adding Some Tec-Variety Curtis Bonk, Elaine Khoo, 2014-05-06 Motivation is central to all things human Online teaching and learning is no different In the early years of the Web however students experienced extremely dry online content affectionately known as shovelware Over time learners were increasingly inundated by bland content and unimaginative activities Worse too often they accepted it as reality In the process online learning became highly lock step and mechanized There was no room for flexibility choice or creative expression of any kind Unfortunately most online content remains lifeless today Legions of learners are interminably bored Part of the reason is that their online and blended courses fail to effectively utilize the smartphones tablets and other wireless and mobile technologies strapped to their bodies or contained in their tote bags At this very moment tens of millions of learners around the planet are navigating through seemingly endless pages of their online courses Unfortunately most of these learners are swimming in this sea of content without much hope for interaction collaboration or engagement The emergence of massive open online courses or MOOCs with tens or even hundreds of thousands of learners in a single course has made the present situation even more prominent and precarious We propose the TEC VARIETY framework as a solution to the lack of meaningful engagement It can shift learners from highly comatose states to extremely engaged ones Adding some TEC VARIETY helps instructors to focus on how to motivate online learners and increase learner retention It also is a comprehensive one stop toolkit for online instructors to inspire learners and renew their own passion for teaching Using ten theoretically driven and proven motivational principles TEC VARIETY offers over a 100 practical yet innovative ideas based on decades of author experience teaching in a variety of educational settings In this book you will discover A wellspring of Web resources 10 highly documented successful motivational principles Hundreds of activities to motivate and engage online learners Proven ideas on how to design interactive and collaborative courses A realistic path toward meaningful and relevant online learning Detailed risk cost and time guidelines for each activity A highly researched basis for each idea and activity Hope yes real hope for engaging online learners
