Improving the Quality of Motorcycle Travel Data Collection
 Dan R. Middleton, 2013 TRB's National Cooperative Highway Research Program NCHRP Report 760 Improving the Quality of Motorcycle Travel Data Collection presents an analysis of traffic counting technologies and data collection protocols designed to help improve the reliability of motorcycle travel data The technologies examined include infrared classifiers inductive loops piezoelectric sensors magnetometers multi sensor technologies and tracking video The report describes the performance of each technology in terms of accuracy initial cost portability and ease of setup and operation The report also evaluates and validates a hypothesis that motorcycle crash locations are reasonable predictors of traffic volume A correlation between crash sites and volume may enable a state department of transportation to select traffic counting locations that could yield more accurate data on motorcycle traffic volumes Publisher's description
