Life Sciences Paper 2 November 2008 Memo:

Citizens and E-Government: Evaluating Policy and Management Reddick, Christopher G.,2010-04-30 This book examines the role that citizens play in the development of electronic government or e government specifically focusing on the impact of e government and citizens exploring issues of policy and management in government Provided by publisher **Economics, Sustainability, and Democracy** Christopher L. Nobbs,2013 This text argues that the major economic problems of the present century involve issues of public goods and common pool resources with which orthodox economic theory based as it is on private markets is ill equipped to deal **Rethinking the Environmental Impacts of Renewable Energy** Alexander Clarke,2016-08-25 Renewable energy is important as a substitute for finite fossil fuels and inflexible nuclear power and could conceivably power the world However this is challenging as the world is currently 80% dependent on fossil fuels and renewable sources produce only about 15% of total energy Conversion technologies for use with many of the eight different primary sources of renewable energy are only just emerging as viable technologies While renewable energy sources will not run out and their use involves little or no release of carbon dioxide or ionising wastes they do have local environmental impacts of their own This book analyses the nature of environmental impacts from renewable sources A novel method of assessing impacts is explored based on a set of parameters centred on how diffuse or concentrated the energy flow is The approach that is developed will inform engineers designers policy makers and planners as well as researchers in the area
