tend to focus on concepts such as science inherent laws or professional standards and international law which establishes a right for everyone to enjoy the benefits of scientific progress thereby implying a duty on the part of the academic community to conduct science in a way that maximizes its benefits to society at large The book concludes by proposing policy reforms that aim to balance these demands and thus reduce tensions within the academic system This book will appeal to scholars and students working at the intersection of law and science as well as policymakers and STEM scientists concerned with issues of academic freedom
