

# Making Connections

(how can sport be used in geography)

## Observations

- Geography within sport encompasses a range of elements from the core of geography.  
*(For example those identified from Digby's analysis of the Olympic Games)*
- Sport is becoming a recognised case-study in which concepts such as culture, race, gender etc. can be taught at various levels.
- Using sport in geography stems from the notion of cultural and recreational geography, however these ideas are integrated into broader topics to allow the teaching of sport within geography.
