As a new medium for questionnaire delivery the Internet has the potential to revolutionize the survey process. Online Web based questionnaires provide several advantages over traditional survey methods in terms of cost, speed, appearance, flexibility, functionality, and usability. Bandilla et al 2003, Dillman 2000, Kwak they can incorporate links and it is possible to encode difficult skip patterns making such patterns virtually invisible to respondents. Despite this and the emergence of numerous tools to support online questionnaire creation, current electronic survey design typically replicates the look and feel of paper based questionnaires, thus failing to harness the full power of the electronic survey medium. A recent environmental scan of online questionnaire design tools found that little if any support is incorporated within these tools to guide questionnaire design according to best practice. Lumsden Morgan 2005. This paper briefly introduces a comprehensive set of guidelines for the design of online questionnaires. It then focuses on an informal observational study that has been conducted as an initial assessment of the value of the set of guidelines as a practical reference guide during online questionnaire design.

2. Background. Online questionnaires are often criticized in terms of their vulnerability to the four standard survey error types: namely coverage, non-response, sampling, and measurement errors. *Proceedings of the International Conference on Computing and Communication Systems* J. K. Mandal, Goutam Saha, Debdatta Kandar, Arnab Kumar Maji, 2018-03-29. The volume contains latest research work presented at International Conference on Computing and Communication Systems I3CS 2016 held at North Eastern Hill University NEHU Shillong, India. The book presents original research results, new ideas, and practical development experiences which concentrate on both theory and practices. It includes papers from all areas of information technology, computer science, electronics, and communication engineering, written by researchers, scientists, engineers, and scholar students and experts from India and abroad.
