Lights Out The Party S Over:

The Party's Over Richard Heinberg, 2005-08-01 The world is about to run out of cheap oil and change dramatically Within the next few years global production will peak Thereafter even if industrial societies begin to switch to alternative energy sources they will have less net energy each year to do all the work essential to the survival of complex societies We are entering a new era as different from the industrial era as the latter was from medieval times In *The Party s Over* Richard Heinberg places this momentous transition in historical context showing how industrialism arose from the harnessing of fossil fuels how competition to control access to oil shaped the geopolitics of the 20th century and how contention for dwindling energy resources in the 21st century will lead to resource wars in the Middle East Central Asia and South America He describes the likely impacts of oil depletion and all of the energy alternatives Predicting chaos unless the U S the world s foremost oil consumer is willing to join with other countries to implement a global program of resource conservation and sharing he also recommends a managed collapse that might make way for a slower paced low energy sustainable society in the future More readable than other accounts of this issue with fuller discussion of the context social implications and recommendations for personal community national and global action Heinberg s updated book is a riveting wake up call for humankind as the oil era winds down and a critical tool for understanding and influencing current U S foreign policy Listen to an interview with Richard Heinberg from WRPI
