*Grammatical Complexity in Academic English* Douglas Biber, Bethany Gray, 2016-05-26 Grammatical Complexity in Academic English uses corpus based analyses to challenge a number of dominant stereotypes and assumptions within linguistics Biber and Gray tackle the nature of grammatical complexity demonstrating that embedded phrasal structures are as important as embedded dependent clauses The authors also overturn ingrained assumptions about linguistic change showing that grammatical change occurs in writing as well as speech This work establishes that academic writing is structurally compressed rather than elaborated that it is often not explicit in the expression of meaning and that scientific academic writing has been the locus of some of the most important grammatical changes in English over the past 200 years rather than being conservative and resistant to change Supported throughout with textual evidence this work is essential reading for discourse analysts sociolinguists and applied linguists as well as descriptive linguists and historical linguists

Transformational Leadership and Organizational Maturity in the Digital Era Paweł Poszytek, 2025-10-15 In the context of profound and widespread global transformations driven by emerging socio economic patterns and accelerated by technological advancements there is a pressing need to redefine the concept of

leadership and to understand why effective leadership is essential for navigating socio economic change This work proposes both a theoretical framework and a practical approach to capturing the contemporary landscape of socio economic transformation with a particular focus on leadership It introduces the author s original model of transformational leadership applicable at both the individual and organizational levels The research models can serve as self assessment tools for individuals and organizations seeking to align their leadership practices with externally validated measures These tools aim to evaluate the extent to which leadership practices are truly transformational In addition they provide insights into digital transformational and organizational maturity defined as the capacity to lead effectively in dynamic and rapidly evolving social and institutional environments The book offers a comprehensive overview of contemporary scientific perspectives on leadership guiding readers through the diversity of existing theories and frameworks It also addresses the conceptual ambiguities and terminological inconsistencies that often hinder a clear understanding of leadership as a construct The central argument of the book is that transformational leadership underpinned by a high degree of organizational maturity represents the most viable strategy for successfully navigating the ongoing socio economic transformations driven by technological innovation Chapters 1 and 2 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
