### Service Loader and Tractor Safety (Loader Attached)

Normally the engine compartment and front of tractor can be accessed with bucket flat on ground. However, due to tractor size and tire variations, servicing the tractor or loader requires the loader to be elevated.

Depending on loader and attachment configurations, do one of the following:

- If servicing tractor or loader requires loader to be elevated, perform the following:

**CAUTION:** Help prevent bodily injury from accidental lowering of loader. Do not perform service around front of tractor with loader elevated unless shut off valve is closed, locking loader into elevated position.

Shut off valve must not be used alone to lock loader in elevated position for servicing tractor. Support loader with floor stands or use lifting straps or chains connected to an overhead hoist.

**NOTE:** Shut off valve is located on loader half of multicoupler on right-hand side of loader.

- a. Raise loader to desired height and support elevated loader with floor stands or use lifting straps or chains connected to an overhead hoist.
- b. Place transmission in **PARK**.
- c. Shut off engine.
