On Both Sides of the Tracks Morgane Cadieu,2024-01-09 An analysis of social mobility in contemporary French literature that offers a new perspective on figures who move between social classes Social climbers have often been the core characters of novels Their position between traditional tiers in society makes them touchstones for any political and literary moment including our own Morgane Cadieu s study looks at a certain kind of social climber in contemporary French literature whom she calls the parvenant Taken from the French term parvenu which refers to one who is newly arrived a parvenant is a character who shuttles between social groups A parvenant may become part of a new social class but devises literary ways to come back constantly undoing any fixed idea of social affiliation Focusing on recent French novels and autobiographies On Both Sides of the Tracks speaks powerfully to issues of emancipation and class Cadieu offers a fresh critical look at tales of social mobility in the work of Annie Ernaux Kaoutar Harchi Michel Houellebecq douard Louis and Marie NDiaye among others shedding fascinating light on upward mobility today as a formal literary problem

Literature and Cartography Anders Engberg-Pedersen,2017-11-24 The relationship of texts and maps and the mappability of literature examined from Homer to Houellebecq Literary authors have frequently called on elements of cartography to ground fictional space to visualize sites and to help readers get their bearings in the imaginative world of the text Today the convergence of digital mapping and globalization has spurred a cartographic turn in literature This book gathers leading scholars to consider the relationship of literature and cartography Generously illustrated with full color maps and visualizations it offers the first systematic overview of an emerging approach to the study of literature The literary map is not merely an illustrative guide but represents a set of relations and tensions that raise questions about representation fiction and space Is literature even mappable In exploring the cartographic components of literature the contributors have not only brought literary theory to bear on the map but have also enriched the vocabulary and perspectives of literary studies with cartographic terms After establishing the theoretical and methodological terrain they trace important developments in the history of literary cartography considering topics that include Homer and Joyce Goethe and the representation of nature and African cartographies Finally they consider cartographic genres that reveal the broader connections between texts and maps discussing literary map genres in American literature and the coexistence of image and text in early maps When cartographic aspirations outstripped factual knowledge mapmakers turned to textual fictions Contributors Jean Marc Besse Bruno Bosteels Patrick M Bray Martin Br ckner Tom Conley J rg D nne Anders Engberg Pedersen John K Noyes Ricardo Padr n Barbara Piatti Simone Pinet Clara Rowland Oliver Simons Robert Stockhammer Dominic Thomas Burkhardt Wolf
