Biological Invasions, a Question of Nature and Society Robert Barbault, Martine Atramentowicz, 2011-01-17 Invasions of introduced species cause varying degrees of harm on the ecosystems in question and it is up to society to deal with the consequences How can we prevent biological invasions How can we assess the risk they represent What can be done to control current invasions Aware of this problem the Ministry of Ecology has requested a community of researchers from a variety of disciplines to decipher these questions using biological sociological and economic approaches Although the definitive response to the problems raised by invasive species in natural spaces is not provided here undeniable progress in understanding mechanisms underlying these invasions can shed light on the decisions which have to be taken by environmental managers Scientists teachers and students will also find results and thought processes in this book to supplement their knowledge

The Light-Green Society Michael Bess, 2003-11-15 The accelerating interpenetration of nature and culture is the hallmark of the new light green social order that has emerged in postwar France argues Michael Bess in this penetrating new history On one hand a preoccupation with natural qualities and equilibrium has increasingly infused France's economic and cultural life On the other human activities have laid an ever more potent and pervasive touch on the environment whether through the intrusion of agriculture industry and urban growth or through the much subtler and more well intentioned efforts of ecological management The Light Green Society limns sharply these trends over the last fifty years The rise of environmentalism in the 1960s stemmed from a fervent desire to save wild nature nature conceived as a qualitatively distinct domain wholly separate from human designs and endeavors And yet Bess shows after forty years of environmentalist agitation much of it remarkably successful in achieving its aims the old conception of nature as a separate sphere has become largely untenable In the light green society where ecology and technological modernity continually flow together a new hybrid vision of intermingled nature culture has increasingly taken its place

Victor Hugo, Romancier de l'Abîme James Hiddleston, 2017-12-02 This study of Victor Hugo's work aims to uncover the diversity the thematic and narrative singularity and the shifting ironies and resistance to interpretative closure of his writing Novels examined include Notre Dame de Paris Les Misérables Les Travailleurs de la Mer Quatre vingt treize and L'Homme qui Rit The 11 essays in the volume bring together various critical approaches from French British and American scholars in an attempt to provide a new point of departure and to provoke discussion of Victor Hugo's novels This publication marks the bicentenary of Hugo's birth in 1802

Metaphysics and the Sciences in Nineteenth-Century France, 2025-07-22 This volume is the first systematic study of the style of reasoning specific to the field of philosophy in nineteenth century France The chapters analyze the often dispersed responses to the fundamental question of the division of the sciences based on the reciprocal relationships of inclusion or exclusion of adversity or sorority between metaphysics and the positive sciences In line with the arrhythmic progress of the different forms of knowledge these responses renew the Condillacian criticisms of the Cartesian order of the

relationships between metaphysics and physics Between a pronounced divorce and a successful marriage this volume traces the philosophical history of the various attempts at divorce or union which as the century progressed resulted in original hybridizations that aspired to define a new and ever problematic French philosophy The Ceremonies and Religious Customs of the Various Nations of the Known World ,1743 *Journal de la Société des américanistes de Paris* ,1914
