Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree **New Jersey Register**, 2013 Resources in Education, 1988 **National Journal**, 2007 **Ohio New Learning Standards in Grade 1 Mathematics** American Book Company, 2014 Alabama College and Career Ready Standards in Grade 1 Mathematics American Book Company, 2014 Oklahoma Academic Standards in Grade 1 Mathematics American Book Company, 2014 **Kansas College and Career Ready Standards in Grade 1 Mathematics** American Book Company, 2014 New Mexico Common Core State Standards in Grade 1 Mathematics American Book Company, 2014
