The Testing Gap Jaekyung Lee,2007-05-01 The objective of this book is to advance our understanding of the design implementation and evaluation of test driven external accountability policies for improving both academic excellence and equity This book provides new insights into debates about the efficacy of highstakes testing through critical synthesis of previous studies and through systematic analysis of the achievement gap trends over the past 15 years The core findings have implications for contemporary national and state policy efforts as mandated by NCLB to close the achievement gap The book alerts readers to scientific institutional and technical threats to the current test driven school accountability system and possible consequences if we fail to counteract those threats and continue the current policy course with underfunded mandates and an over reliance on testing and sanctions Managing for Learning Melissa Adelman,Renata

Lemos,2021-05-20 How can countries make sustainable gains in student learning at scale This is a pressing question for Latin America and the Caribbean LAC and the developing world more broadly as countries seek to build human capital to drive sustainable growth Significant progress in access has expanded coverage such that nearly all children in the region attend primary school but many do not gain basic skills and drop out before completing secondary school in part due to low quality service delivery The preponderance of evidence shows that it is learning and not schooling in and of itself that contributes to individual earnings economic growth and reduced inequality For LAC in particular low levels of human capital are a critical factor in explaining the region s relatively weak growth performance over the last half century The easily measurable inputs are well known and the end goal is relatively clear but raising student achievement at scale remains a challenge Why Part of the answer lies in management the managers structures and practices that guide how inputs into the education system are translated into outputs and ultimately outcomes While management is often mentioned as an important factor in education policy discussions relatively little quantitative research has been done to define and measure it And even less has been done to unpack how and how much management matters for education quality This study presents new conceptual and empirical contributions that can be synthesized in four key messages 1 Student learning is unlikely to improve at scale without better management 2 Management quality can be measured and should be measured as a catalyst for improvement 3 Management affects how well every level of an education system functions from individual schools to central technical units and how well they work together 4 Several pathways to strengthening management are open to LAC countries now with the potential for significant results The study elaborates on each of these messages synthesizing recent data and research and presenting the results of several new research initiatives from across the region **Approximate Number System and Mathematics** Jingguang Li,Xinlin Zhou,Marcus Lindskog,2019-11-25 Humans process quantity information without the aid of language or symbols to guide a variety of everyday life decisions The cognitive system that supports this intuitive skill is often referred to as the approximate number system ANS It has been argued that the ANS

serves as the foundation of the formal symbolic number system mathematics Abundant empirical evidence is supportive of this view acuity of the ANS is positively correlated with symbolic math performance training of the ANS may cause improvements in symbolic math performance and the ANS and symbolic number processing may share a common neural underpinning However recently several theories and empirical data cast doubt on the role of the ANS in symbolic math processing This e book aims to advance our understanding of the underlying mechanisms of the overlap between the ANS and mathematics

Twin Pandemics Alison L. Bailey, Jose Felipe Martinez, Andreas Oranje, Molly Faulkner-Bond, 2023-09-19 This book examines how the COVID 19 pandemic and racial inequities affect the educational assessment of students either separately or in combination as the health crisis was viewed as a factor intersecting with and exacerbating existing racial inequities in educational systems The four empirical papers in this book attend to the challenges of implementing virtual standardized testing during the coronavirus pandemic the different educational and assessment experiences of diverse groups of school age students and the reconsideration of traditional assessment approaches in response to mounting research evidence and growing concerns around enduring social and racial inequities faced by Black Latinx Asian Indigenous and other non white citizens and communities The four conceptual papers focus primarily on the ways in which assessment may contribute to systemic racism and offer potential solutions to move the educational assessment field forward In totality the volume offers needed empirical evidence innovative methodological approaches and theoretical and substantive examinations of the effects of the twin pandemics Twin Pandemics will be a key resource for academics researchers and advanced students of Educational Assessment Education Psychometrics Educational Research Ethnic Studies Research Methods Sociology of Education and Psychology The chapters included in this book were originally published as a special issue of Educational Assessment

Handbook of BRICS and Emerging Economies PB Anand, Shailaja Fennell, Flavio Comim, 2020-12-16 Ever since Jim O Neill at Goldman Sachs coined the term BRICS in 2001 there have been many different assessments of these major emerging economies with some even proclaiming that the promise of the BRICS comprising Brazil Russia India China and South Africa is over However the so called arranged marriage still seems to be working well with the club having become a formal international forum with summit declarations ministerial meetings and numerous BRICS wide fora Is this euphoria misplaced Is there a BRICS model of economic and human development Are inequalities increasing and is this the denouncement of the economic successes Are geo political tensions rising between these nations During the post COVID 19 situation the importance of bilateral and multilateral co operation mechanisms and institutions is becoming clear This book focuses on one such emerging co operation mechanism of BRICS but also more widely on those five

countries and other similar economies As a global depression looms large global economic recovery depends on the performance of not only its largest economies but also many other important and significant economies within the so called G20 group Even prior to the COVID 19 outbreak multilateral institutions have been under considerable strain as with the relationship between the United States of America and China and risks to global economic recovery appear very real This book brings together multi disciplinary perspectives from over sixty scholars and it presents a comprehensive and deep dive into the BRICS and emerging economies and into an understanding the political economic and social contexts that can help in designing approaches for recovery and regaining the last momentum in the journey towards the Sustainable Development Goals

Social Studies Education in South and South East Asian Contexts Kerry J Kennedy,2021-07-22 The education of young people is context bound This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education There is not a single context across this broad geographical expanse rather different religions different political systems and different values exert influences that create distinctive programmes that characterise different countries Yet there are also commonalities such as the post colonial nature of most of the countries portrayed in this book determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities There are also voices of resistance in these chapters recognising the realities of local contexts but also recognising the need for change Social studies education in these contexts may well be descended from its origins in North America but in South and South Asian contexts it has taken on new purposes new forms and new values Education researchers policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them **Education** Sandra M.
