

Question 1

$$f'(x) = 5 - 2x^2$$

Paper provided by www.gamtopostpapers.com

$$f(3) = 5 \text{ on } f(x) \rightarrow f(3) = 5$$
$$f(x) = \int f'(x) dx = \int 5 - 2x^2 dx = 5x - \frac{2x^3}{3} + c$$

$$f(3) = 5 \rightarrow 5 = 5 \times 3 + c - \frac{2 \times 3^3}{3} \rightarrow 5 = 15 - 18 + c$$

$$c = 8$$

$$f(x) = 5x - \frac{2}{3}x^3 + 8$$

Maths As Cie 2015 9709 12:

Handbook of Computability and Complexity in Analysis Vasco Brattka, Peter Hertling, 2021-06-04 Computable analysis is the modern theory of computability and complexity in analysis that arose out of Turing's seminal work in the 1930s. This was motivated by questions such as which real numbers and real number functions are computable and which mathematical tasks in analysis can be solved by algorithmic means. Nowadays this theory has many different facets that embrace topics from computability theory, algorithmic randomness, computational complexity, dynamical systems, fractals, and analog computers up to logic, descriptive set theory, constructivism, and reverse mathematics. In recent decades, computable analysis has invaded many branches of analysis, and researchers have studied computability and complexity questions arising from real and complex analysis, functional analysis, and the theory of differential equations up to geometric measure theory and topology. This handbook represents the first coherent cross-section through most active research topics on the more theoretical side of the field. It contains 11 chapters grouped into parts on computability in analysis, complexity, dynamics, and randomness, and constructivity, logic, and descriptive complexity. All chapters are written by leading experts working at the cutting edge of the respective topic. Researchers and graduate students in the areas of theoretical computer science and mathematical logic will find systematic introductions into many branches of computable analysis and a wealth of information and references that will help them to navigate the modern research literature in this field.

Advances in Bioinformatics and Computational Biology Ronnie Alves, 2018-10-23 This book constitutes the refereed proceedings of the 11th Brazilian Symposium on Bioinformatics BSB 2018 held in Rio de Janeiro, Brazil, in October–November 2018. The 13 revised full papers presented were carefully reviewed and selected from 26 submissions. The papers cover all aspects of bioinformatics and computational biology.

High-Performance Modelling and Simulation for Big Data Applications Joanna Kołodziej, Horacio

González-Vélez, 2019-03-25 This open access book was prepared as a Final Publication of the COST Action IC1406 High Performance Modelling and Simulation for Big Data Applications cHiPSet project. Long considered important pillars of the scientific method, Modelling and Simulation have evolved from traditional discrete numerical methods to complex data intensive continuous analytical optimisations. Resolution, scale, and accuracy have become essential to predict and analyse natural and complex systems in science and engineering. When their level of abstraction raises to have a better discernment of the domain at hand, their representation gets increasingly demanding for computational and data resources. On the other hand, High Performance Computing typically entails the effective use of parallel and distributed processing units coupled with efficient storage, communication, and visualisation systems to underpin complex data intensive applications in distinct scientific and technical domains. It is then arguably required to have a seamless interaction of High Performance Computing with Modelling and Simulation in order to store, compute, analyse, and visualise large data sets in science and engineering. Funded by the European Commission, cHiPSet has provided a dynamic trans-European forum for their members and

distinguished guests to openly discuss novel perspectives and topics of interests for these two communities This cHiPSet compendium presents a set of selected case studies related to healthcare biological data computational advertising multimedia finance bioinformatics and telecommunications Bioinformatics Research and Applications Zhipeng Cai,Pavel Skums,Min Li,2019-05-27 This book constitutes the proceedings of the 15th International Symposium on Bioinformatics Research and Applications ISBRA 2019 held in Barcelona Spain in June 2019 The 22 full papers presented in this book were carefully reviewed and selected from 95 submissions They were organized in topical sections named genome analysis systems biology computational proteomics machine and deep learning and data analysis and methodology Machines, Computations, and Universality Jérôme Durand-Lose,Sergey Verlan,2018-06-04 This book constitutes the refereed proceedings of the 8th International Conference on Machines Computations and Universality MCU 2018 held in Fontainebleau France in June 2018 The 9 revised full papers presented together with 5 invited talks were carefully reviewed and selected from numerous submissions MCU explores computation in the setting of various discrete models Turing machines register machines cellular automata tile assembly systems rewriting systems molecular computing models neural models concurrent systems etc and analog and hybrid models BSS machines infinite time cellular automata real machines quantum computing etc **Science Citation Index** ,1995 Vols for 1964 have guides and journal lists
