La Logique De L'honneur Gestion Des Entreprises Et Traditions Nationales:

The Innovation Odyssey Christophe Midler, Marc Aloch, Christophe De Charentenay, 2023-04-21 Affordable is not typically the first adjective used to describe an electric automobile This book traces the history of an affordable electric car from its genesis to its marketing This history is more than a singular adventure It is the analysis of a project that allows us to understand the key issues of strategy and management of contemporary innovation The book features in lessons in Strategy revealing the complexity of international product development and the conditions for its implementation in today's fragmented world Project management showing what is required to succeed in the a priori impossible challenge of a design within an alliance between five partners from four different countries Innovation demonstrating that the electrification of mobility can be combined with affordable prices Industrial policy using the emblematic domain of electric vehicles to illustrate the major role of public authorities in technology the future direction of this role and the importance in the competition between Western and Chinese industries Intrapreneurship showing that a start up is not the only context in which it is possible to attempt and experience breakthroughs

Cross-Cultural Management Jean-François Chanlat, Eduardo Davel, Jean-Pierre Dupuis, 2013-07-24 All cultures appear to share the belief that they do things correctly while others until proven otherwise are assumed to be ignorant or barbaric When people from different cultures work together and cannot take shared meanings for granted managers face serious challenges An individual's parsing of an experience and its meaning may vary according to several cultural scales national professional industrial and local Awareness of cultural differences and the willingness to view them as a positive are therefore crucial assets This edited textbook sets itself apart from existing cross cultural management texts by highlighting to the reader the need to avoid both ethnocentrism and the belief in the universality of his or her own values and ways of thinking the success of international negotiations and intercultural management depends on such openness and acceptance of real differences It encourages the development of nomadic intelligence and the creative use of a culture's resources according to a symbolic anthropology perspective Through the essays and case studies in the chapters readers will become aware of the intercultural dimension of business activities and better understand how they affect work Cross Cultural Management will help interested parties students of business management international relations and other disciplines and business managers and other professionals develop their ability to interact take action and give direction in an intercultural context
