Linguistic Influences on Mathematical Cognition Ann Dowker,Hans-Christoph Nuerk,2017-06-16 For many years an abstract amodal semantic magnitude representation largely independent of verbal linguistic representations has been viewed as the core numerical or mathematical representation This assumption has been substantially challenged in recent years Linguistic properties affect not only verbal representations of numbers but also numerical magnitude representation spatial magnitude representations calculation parity representation place value representation and even early number acquisition Thus we postulate that numerical and arithmetic processing are not fully independent of linguistic processing This is not to say that in patients magnitude processing cannot function independently of linguistic processing we just suppose these functions are connected

in the functioning brain So far much research about linguistic influences on numerical cognition has simply demonstrated that language influences number without investigating the level at which a particular language influence operates After an overview we present new findings on language influences on seven language levels Conceptual Conceptual properties of language Syntactic The grammatical structure of languages beyond the word level influences Semantic The semantic meaning or existence of words Lexical The lexical composition of words in particular number words Visuo spatial orthographic Orthographic properties such as the writing reading direction of a language Phonological Phonological phonetic properties of languages Other language related skills Verbal working memory and other cognitive skills related to language representations We hope that this book provides a new and structured overview on the exciting influences of linguistic processing on numerical cognition at almost all levels of language processing South African national bibliography ,1999 Classified list with author and title index **Yearbook of International Organizations 2013-2014 (Volumes 1a-1b)** Union Of International Associations,Union of International Associations,2013-06-21 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events The United States Army and Navy Journal and Gazette of the Regular and Volunteer Forces ,1894 **The Uganda Gazette** Uganda,2015-12 **Australian Education Index** ,1980 **The Advertiser's ABC of Official Scales & Charges and Advertisement Press Directory** ,1895 *The Status of Pre-college Science, Mathematics, and Social Science Education, 1955-1975* ,1978 **Editor & Publisher** ,1928 The fourth estate Who's who in America ,1958 **Illinois Reading Council Journal** ,2013 **Forthcoming Books** Rose Arny,2003 **Who's who in American Law** ,1977 **Effective Instruction** Myles I.
