

QUESTION 1

1.1 Solve for x :

$$1.1.1 \quad x^2 - 9 = 0 \quad (2)$$

$$1.1.2 \quad x - 5 + \frac{2}{x} = 0 \quad (\text{correct to TWO decimal places}) \quad (4)$$

$$1.1.3 \quad x = 1 + \sqrt{7 - x} \quad (5)$$

$$1.1.4 \quad x^2 + 2x - 15 \geq 0 \quad (3)$$

1.2 Solve simultaneously for x and y in:

$$y + 2x = 3$$

$$y^2 - y = 3x^2 - 5x \quad (6)$$

1.3 Simplify completely, WITHOUT the use of a calculator: $\sqrt[n]{\frac{10^n + 2^{n+2}}{5^{2n} + 4(5^n)}}$ (4)

Global Tax Fairness Thomas Pogge, Krishen Mehta, 2016-02-04 This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today and which deprive both developing and developed countries of critical tax resources It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues and are an impediment to sustainable development A major break through for financial transparency is now within reach The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act

Sustainable Green Chemistry Mark Anthony Benvenuto, 2017-04-10 Sustainable Green Chemistry the 1st volume of Green Chemical Processing covers several key aspects of modern green processing The scope of this volume goes beyond bio and organic chemistry highlighting the ecological and economic benefits of enhanced sustainability in such diverse fields as petrochemistry metal production and wastewater treatment The authors discuss recent progresses and challenges in the implementation of green chemical processes as well as their transfer from academia to industry and teaching at all levels Selected successes in the greening of established processes and reactions are presented including the use of switchable polarity solvents actinide recovery using ionic liquids and the removal of the ubiquitous bisphenol A molecule from effluent streams by phytodegradation

The History of the Study of Landforms or the Development of Geomorphology, Volume 5 T.P. Burt, A.S. Goudie, H.A. Viles, 2022-10-20 Co published with British Society for Geomorphology This volume is the fifth in the definitive series The History of the Study of Landforms or the Development of Geomorphology Volume 1 1964 dealt with contributions to the field up to 1890 Volume 2 1973 with the concepts and contributions of William Morris Davis and Volume 3 1991 covered historical and regional themes during the classic period of geomorphology 1890 1950 Volume 4 2008 concentrated on studies of geomorphological processes and Quaternary geomorphology between 1890 and 1965 by the end of this period process based studies had become dominant Volume 5 builds on this platform covering in detail the revolutionary changes in approach that characterized the study of geomorphology in the second half of the twentieth century It is divided into three sections the first deals with changes in approach and method the second with changes in ideas and the broader scientific context within which geomorphology is

studied and the final section details advances in research on processes and landforms The volume s objective is to describe and analyse many of the developments that provide a foundation for the rich and varied subject matter of twenty first century geomorphology An Age of Accountability John L. Rury,2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree *Geologic Fundamentals of Geothermal Energy* David R. Boden,2016-09-19 Geothermal energy stands out because it can be used as a baseload resource This book unlike others examines the geology related to geothermal applications Geology dictates a how geothermal resources can be found b the nature of the geothermal resource such as liquid or vapor dominated and c how the resource might be developed ultimately such as flash or binary geothermal plants The compilation and distillation of geological elements of geothermal systems into a single reference fills a notable gap

side Michail Maniadakis, Marc Wittmann, Sylvie Droit-Volet, Yoonsuck Choe, 2015-06-05 From the moment of birth humans and animals are immersed in time all experiences and actions evolve in time and are dynamically structured The perception of time is thus a capacity indispensable for the control of perception cognition and action The last 10 years have witnessed a remarkable resurgence of interest in timing and time perception with a continuously increasing number of researchers exploring these innate abilities However existing robotic systems largely neglect the key role of time in cognition and action This is a major barrier for accomplishing the long term goal of symbiotic human robot interaction The critical question is how is time instantiated in a biological system and how can it be implemented in an artificial system Recent years have for example seen an increasing focus on the relationship between affective states and the experience of time The influence of affective states on subjective time seems to depend on the embodiment of emotions intertwined affective and interoceptive states may create our subjective experience of time Since robotic systems are in essence embodied information processing systems that interact with the real world we hope to inspire a reciprocal exchange of ideas between the field of Robotics and the Cognitive Neurosciences In this research topic we call researchers from different disciplines Robotics Neurosciences and Psychology to present their empirical work their models or reviews on the question of how time judgments are instantiated in biological and artificial systems Of particular interest are papers on time perception in humans and animals with a focused interest on embodied time perception i e the influence of affective and body states on time judgments Moreover the present Research Topic seeks to gather papers discussing the key role of time on different aspects of robotic cognition as well as modeling approaches We are interested in paving the way for a new generation of intelligent computational systems that incorporate the sense of time in their processing loop and thus accomplish more efficient and more advanced cognitive capacities
