Mathematical Literacy P1 Sept 2014

Ben Akpan, Teresa J. Kennedy

Mathematical Literacy P1 Sept 2014:

Science Education in Theory and Practice Ben Akpan, Teresa J. Kennedy, 2020-09-08 This book provides a collection of applicable learning theories and their applications to science teaching. It presents a synthesis of historical theories while also providing practical implications for improvement of pedagogical practices aimed at advancing the field into the future. The theoretical viewpoints included in this volume span cognitive and social human development, address theories of learning and describe approaches to teaching and curriculum development. The book presents and discusses humanistic, behaviourist, cognitivist and constructivist theories. In addition, it looks at other theories such as multiple intelligences theory, systems thinking, gender sexuality theory and indigenous knowledge systems. Each chapter follows a reader motivated approach anchored on a narrative genre. The book serves as a guide for those aiming to create optional learning experiences to prepare the next generation STEM workforce. Chapter: The Bildung Theory From von Humboldt to Klafki and Beyond is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com **Primary Science Education in East Asia** Yew-Jin Lee, Jason Tan, 2018-09-26 This edited volume is a state of the art comparison of primary science education across six East Asian regions namely the People's Republic of China, Republic of Korea, Republic of China, Hong Kong SAR, Japan and Singapore. While news of educational policies, classroom teaching, assessment and other educational innovations here often surface in the international media, this book brings together for the first time relevant information regarding educational systems and strategies in primary science in East Asia. Above all, it is a readable yet comprehensive survey; readers would have an accurate sense of what has been accomplished, what has not worked so well and what remains to be done. Invited experts in comparative education research and/or science education also provide commentary by discussing common themes across the six regions. These types of critical synoptic reviews add much value by enabling readers to understand broad commonalities and help synthesize what must surely be a bewildering amount of very interesting albeit confusing body of facts, issues and policies. Education in East Asia holds many lessons both positive and negative to offer to the rest of the world to which this volume is a timely contribution to the literature. **3rd International Conference on Lifelong Education and Leadership for ALL-ICLEL 2017** Prof. Dr. Paulo Alberto da SILVA PEREIRA, 2018-12-27 Copyright 2017 ICLEL Conferences.
