Sanchez, 2017-09-01 Building Support for Scholarly Practices in Mathematics Methods is the product of collaborations among over 40 mathematics teacher educators MTEs who teach mathematics methods courses for prospective PreK 12 teachers in many different institutional contexts and structures Each chapter unpacks ways in which MTEs use theoretical perspectives to inform their construction of goals activities designed to address those goals facilitation of activities and ways in which MTEs make sense of experiences prospective teachers have as a result The book is organized in seven sections that highlight how the theoretical perspective of the instructor impacts scholarly inquiry and practice The final section provides insight as we look backward to reflect and forward with excitement moving with the strength of the variation we found in our stories and the feeling of solidarity that results in our understandings of purposes for and insight into teaching mathematics methods This book can serve as a resource for MTEs as they discuss and construct scholarly practices and as they undertake scholarly inquiry as a means to systematically examine their practice

that integrates and enhances student s affective and cognitive functioning The earlier edition of this book has become a standard reference for scholars and practitioners in the fields of values education moral education and character education Its citation rates reads and downloads have been consistently and enduringly high as have those of its companion text Values Pedagogy and Student Achievement A decade on the main purpose of the revised edition is to update and incorporate new research and practice relevant to values education Recent insights in the fields of neuroscience and social and emotional learning and their implications for education and student wellbeing are more overt than they were when the first edition was being compiled Additionally advanced thinking in the field of epistemology how humans come to know and therefore learn has also sharpened especially through the later writings of prominent scholars like Jurgen Habermas The revised edition has preserved the essential spirit and thrust of the original edition while making space for some of these new insights about the potential of values education to establish optimal and harmonious learning and social environments for both students and teachers

Mathematics Education in a Neocolonial Country: The Case of Papua New Guinea Patricia Paraide,Kay Owens,Charly Muke,Philip Clarkson,Christopher Owens,2023-01-10 Most education research is undertaken in western developed countries While some research from developing countries does make it into research journals from time to time but these articles only emphasize the rarity of research in developing countries The proposed book is unique in that it will cover education in Papua New Guinea over the millennia Papua New Guinea s multicultural society with relatively recent contact with Europe and the Middle East provides a cameo of the development of education in a country with both a colonial history and a coup less transition to independence Discussion will focus on specific areas of mathematics education that have been impacted by policies research circumstances and other influences with particular emphasis on pressures on education in the last one and half centuries This volume will be one of the few records of this kind in the education research literature as an in depth record and critique of how school mathematics has been grown in Papua New Guinea from the late 1800s and should be a useful addition to graduate programs mathematics education courses history of mathematics as well as the interdisciplinary fields of cross cultural studies scholarship focusing on globalization and post decolonialism linguistics educational administration and policy technology education teacher education and gender studies

Building the Foundation: Whole Numbers in the Primary Grades Maria G. Bartolini Bussi,Xu Hua Sun,2018-03-29 This twenty third ICMI Study addresses for the first time mathematics teaching and learning in the primary school and pre school setting while also taking international perspectives socio cultural diversity and institutional constraints into account One of the main challenges of designing the first ICMI primary school study of this kind is the complex nature of mathematics at the early level Accordingly a focus area that is central to the discussion was chosen together with a number of related questions The broad area of Whole Number Arithmetic WNA including operations and relations and arithmetic word problems forms the core content of all primary mathematics curricula The study of this core content area is often regarded as foundational for

later mathematics learning However the principles and main goals of instruction on the foundational concepts and skills in WNA are far from universally agreed upon and practice varies substantially from country to country As such this study presents a meta level analysis and synthesis of what is currently known about WNA providing a useful base from which to gauge gaps and shortcomings as well as an opportunity to learn from the practices of different countries and contexts

Transparency in Assessment - Exploring the Influence of Explicit Assessment Criteria Anders Jönsson, Frans Prins, 2019-04-03 In many schools and higher education institutions it has become common practice to share assessment criteria with students Sometimes it is required for accountability purposes at other times criteria are used as a means to communicate expectations to students However the idea that explicit assessment criteria should be shared with students has been contested On the one hand research has shown that explicit criteria may positively affect student performance reduce their anxiety as well as support students use of self regulated learning strategies On the other hand there are fears that explicit criteria may have a restraining influence on students learning as well as limiting their autonomy and creativity There are also indications of students becoming more performance oriented as opposed to learning oriented when being provided with explicit assessment criteria Taken together it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria and under which circumstances it is not In particular empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence In this book we therefore bring different perspectives on transparency in assessment together in order to further our understanding of how students are influenced by the use of explicit assessment criteria A deeper understanding of the influence of explicit assessment criteria on students understanding of criteria motivation and learning is equally imperative for future research and educational practice both of which need to go beyond individual opinions and convictions

Polka, John William McKenna, 2016-09-14 This book is about doing what s right for public education in the United States in this age of intensive curriculum convergence planned instructional standardization and oppressive accountability procedures Information is presented about why and how educators parents students community members and policy makers have decided to protest against current state and federal educational policies and procedures The practical experiences of parents

teachers principals school superintendents school board members and professors are analyzed in chapters of this book Their first hand experiences with the various components of the current reform movement are poignantly presented Through their voices the frustrations with the serious flaws associated with this reform agenda are passionately and logically articulated They comprehensively explain their personal and professional motivations for organizing and fomenting a rethinking in school reform implementation procedures and they advocate their smarter approach to school reforms in our country The book includes key references that elucidate the need to seriously re think the directions and strategies of contemporary schooling in order to maintain enlightened creative instruction based on exciting student centered curriculum experiences and professional educational judgments Morgen-Post Wien Leopold Landsteiner,1872
