EDITABLE

Using addition and subtraction only, use the four two-digit numbers to reach as close to the target of 100 as possible.

Partner 1

$$47 - 41 = 6$$

$$6 + 15 = 21$$

$$21 + 75 = 96 \text{ WINNER}$$

Partner 2

$$47 - 15 = 32$$

$$32 + 75 = 107$$

$$107 - 41 = 66$$

Whoever is closest to the target of 100 wins the game.
Choose 4 other digits to fill the grid and have another go.

Addition and subtraction reflection

What would your ideal numbers be for your grid? Why?

Can you predict whether you will be close or far away from your target by just looking at your four numbers?

Did you notice anything about the numbers you chose and the totals they made?

Addition and subtraction investigation

With your partner choose four two-digit numbers.
You have one minute to fill the grid.

Example:

4

1

Using addition and subtraction only, reach as close to the target of 100 as possible.

Partner 1

$$47 - 41 = 6$$

$$6 + 15 = 21$$

$$21 + 75 = 96$$

Whoever is closest to the target of 100 wins the game.
Choose 4 other digits to fill the grid and have another go.

Teacher notes

Starting position:

These questions can help to prompt and encourage thinking. Children should be making judgements about whether they are adding or subtracting to reach the target required. They should be using their knowledge of place value to predict the order to their calculations to obtain their result.

Are your digits close to the target? Why?

Can you predict if you are getting close to the target by just looking at the numbers you have chosen?

What total will you reach first? Why?

Why did you choose that number?

Which number will you choose for your second? Why?

Which number will you choose for your third? Why?

Which number do you think is most likely to be close to 100? Why?

Steps to play:

There are a few steps to play the game. Please choose the way that will work best for your class.

- Children choose 4 numbers between 0-9 to place in the grid.
- Children write down their four two-digit numbers they have made.
 - Read the ones.
 - Read the tens.
 - Read the hundreds.
 - Read the thousands.
 - Read the millions.
- Children start with the target of 100 to get as close as possible to.
- Each child is to use just one addition and subtraction with the four two-digit numbers to get as close as possible to the target.
- The child closest to the target wins the game.
- Please, you can decide if they start choosing the digits or choose with someone. The choice of who starts the numbers is on the grid left is right, no one else knows, so decide where they place each number with purpose.
- It is good to work together to reach target.
- They game is done but this time it is not about getting it in about working together to get as close as possible to the target. The aim is to encourage discussion between children.
