**Caught in the Act** Cyril Julie, Lorna Holtman, Charles R. Smith, 2019-12-11 The research reported in *Caught in the Act* draws together the insights gained from a continuous professional development initiative for high school mathematics teachers teaching in low socio economic status and socially challenged environments in South Africa. The chapters show the possibilities for enhancing achievement in school mathematics if a strength based approach is adopted to develop teaching with teachers and when their concerns are taken seriously. The book demonstrates that the ecological relevance fitness for the context in which teachers are teaching of the goods developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education. The book is of interest to mathematics teachers, school leaders, mathematics curriculum advisors, policy makers and researchers. The Most Important Year Suzanne Bouffard, 2017-09-05 An eye opening look inside pre K in America and what it will take to give all children the best start in school possible. At the heart of this groundbreaking book are two urgent questions: What do our young children need in the earliest years of school and how do we ensure that they all get it? Cutting edge research has proven that early childhood education is crucial for all children to gain the academic and emotional skills they need to succeed later in life. Children who attend quality pre K programs have a host of positive outcomes including better language literacy, problem solving and math skills down the line and they have a leg up on what appears to be the most essential skill to develop at age four: strong self control. But even with this overwhelming evidence, early childhood education is at a crossroads in America. We know that children can and do benefit, but we also know that too many of our littlest learners don't get that chance. Millions of parents can't find spots for their children or their preschoolers end up in poor quality programs. With engrossing storytelling, journalist Suzanne Bouffard takes us inside some of the country's best pre K classrooms to reveal the sometimes surprising ingredients that make them work and to understand why some programs are doing the opposite of what is best for children. It also chronicles the stories of families and teachers from many backgrounds as they struggle to give their children a good start in school. This book is a call to arms when we are at a crucial moment and perhaps on the verge of a missed opportunity. We now have the means and the will to have universal pre kindergarten, but we are also in grave danger of not getting it right. *Government Reports Index*, 1972 *Maths Edge Memo* Natalie Burger, 2018
