Bartolini Bussi,Xu Hua Sun,2018-03-29 This twenty third ICMI Study addresses for the first time mathematics teaching and learning in the primary school and pre school setting while also taking international perspectives socio cultural diversity and institutional constraints into account One of the main challenges of designing the first ICMI primary school study of this kind is the complex nature of mathematics at the early level Accordingly a focus area that is central to the discussion was chosen together with a number of related questions The broad area of Whole Number Arithmetic WNA including operations and relations and arithmetic word problems forms the core content of all primary mathematics curricula The study of this core content area is often regarded as foundational for later mathematics learning However the principles and main goals of instruction on the foundational concepts and skills in WNA are far from universally agreed upon and practice varies substantially from country to country As such this study presents a meta level analysis and synthesis of what is currently known about WNA providing a useful base from which to gauge gaps and shortcomings as well as an opportunity to learn from the practices of different countries and contexts *Comparing High-Performing Education Systems* Charlene Tan,2018-09-03 Comparing High Performing Education Systems provides original insights into the educational structures ideologies policies and practices in Singapore Shanghai and Hong Kong Taking as its basis their global reputation and consistently strong performance in formal assessments the author provides an in depth analysis and comparison of these three education systems that draws on cutting edge research Chapters explore the dominant cultural and educational norms in Singapore Shanghai and Hong Kong to give a wider picture of these high performing education systems The performance of students in international large scale assessments such as Programme for International Student Assessment PISA Trends in International Mathematics and Science Study TIMSS and Progress in International Reading Literacy Study PIRLS is considered alongside an exploration of

attitudes to schooling tutoring and assessment The book shows how Singapore Shanghai and Hong Kong exemplify an East Asian Educational Model EAEM Such a model is rooted in and shaped by Confucian habitus unconscious and ingrained worldviews dispositions and habits that reflect the standards of appropriateness in a Confucian Heritage Culture aspires high performance a balance between academic excellence and holistic development and utilises educational harmonisation the art of bringing together different and contradictory means and ends to achieve desired educational outcomes Informative and thought provoking this book is a useful reference for policymakers researchers educators and general readers on high performing education systems school reforms in East Asia Confucian influences on education and cross cultural policy learning and transfer *How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and Practice* Rong Lian, Chang Liu, Juzhe Xi, 2024-07-17 Online learning has become more and more common globally whether for comfort adapting to work hours or just having the freedom to study from anywhere And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance Relevant research in cognitive science has revealed possible limitations in online learning For example the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure Learners may experience cognitive overload metacognitive illusion and low learning efficiency in self regulated learning It follows that in the post COVID 19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden Therefore it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model **Updated Maths Zone 8 (18-19)** No Author, 2020-10-10 Maths Zone Updated Edition is a series of eight books for Classes 1 to 8 The series conforms to the objectives outlined in National Curriculum Framework The updated edition of Maths Zone trying to make a difference with its new features incorporates the latest requirements across various boards With its activity oriented approach the series aims to inculcate lateral thinking analytical research and deduction skills in students thus urging them to explore beyond the boundaries of textual knowledge **Proceedings of International Conference on Recent Innovations in Computing** Zoltán Illés, Chaman Verma, Paulo J.
