Maths 2014 June Exam For Grade 10:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

The Testing Charade Daniel Koretz,2017-08-31 For decades we ve been studying experimenting with and wrangling over different approaches to improving public education and there s still little consensus on what works and what to do The one thing people seem to agree on however is that schools need to be held accountable we need to know whether what they re doing is actually working But what does that mean in practice High stakes tests Lots of them And that has become a major problem Daniel Koretz one of the nation s foremost experts on educational testing argues in *The Testing Charade* that the whole idea of test based accountability has failed it has increasingly become an end in itself harming students and corrupting the very ideals of teaching In this powerful polemic built on unimpeachable evidence and rooted in decades of experience with educational testing Koretz calls out high stakes testing as a sham a false idol that is ripe for manipulation and shows little evidence of leading to educational improvement Rather than setting up incentives to divert instructional time to pointless test prep he argues we need to measure what matters and measure it in multiple ways not just via standardized tests Right now we re lying to ourselves about whether our children are learning And the longer we accept that lie the more damage we do It s time to end our blind reliance on high stakes tests With *The Testing Charade* Daniel Koretz insists that we face the facts and change course and he gives us a blueprint for doing better
